

ODISHA ROAD SAFETY DASHBOARD

#Come Home Safe

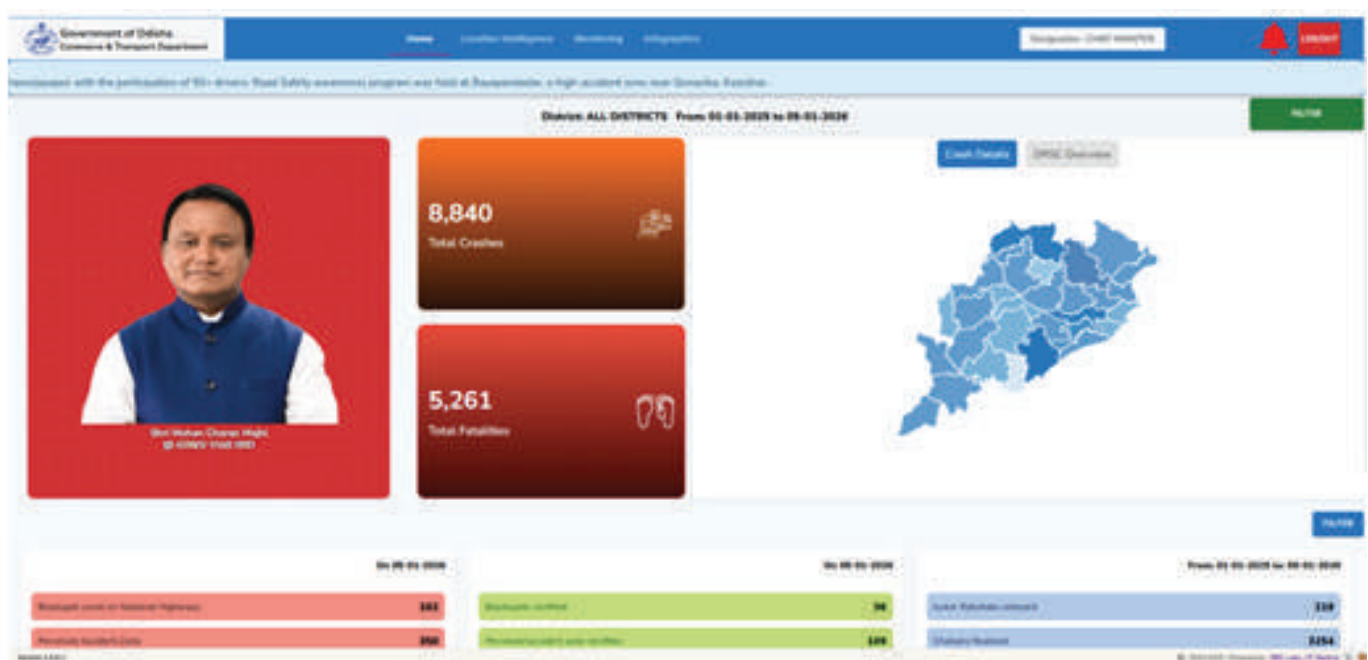

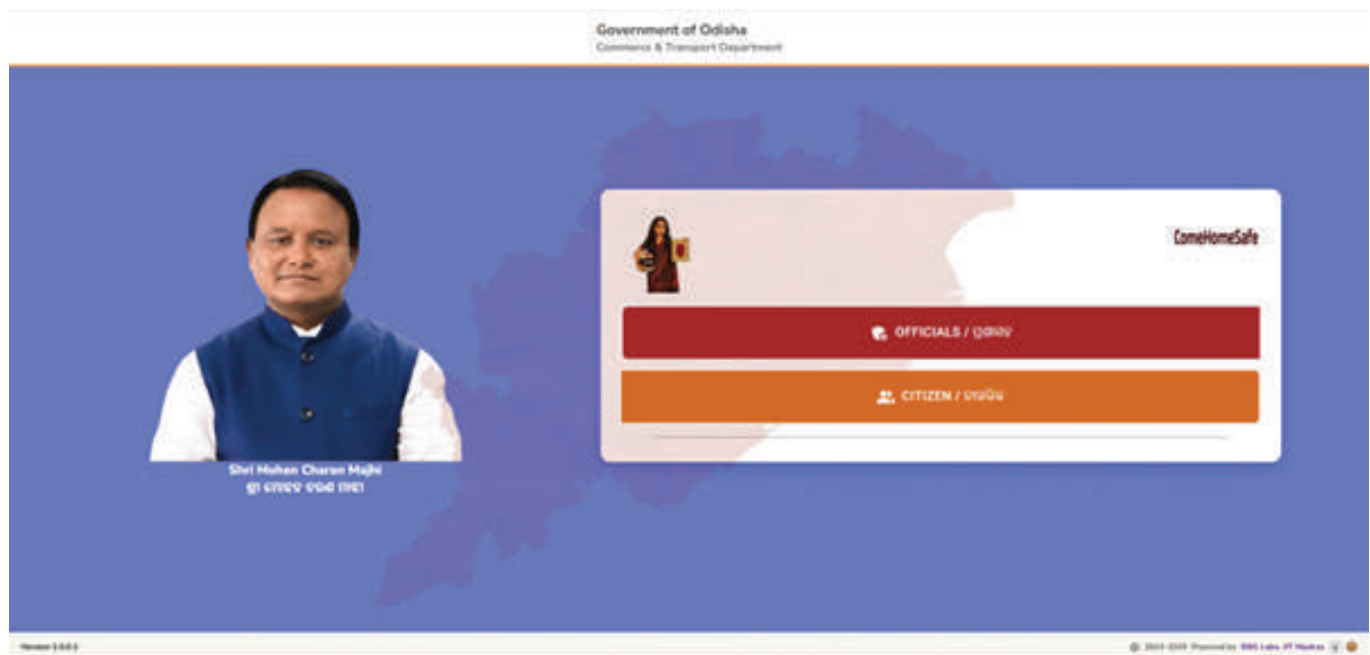

RATH - Odisha Integrated Road Safety Dashboard

1. Government of Odisha has undertaken a strategic initiative to develop an Integrated Road Safety Dashboard in collaboration with IIT Madras. This platform is aimed at strengthening data-driven planning, monitoring, and accountability across all road safety stakeholders.
2. The Integrated Road Safety Dashboard is envisaged as a critical decision-support tool for senior leadership and line departments, enabling timely, coordinated, and targeted interventions to reduce road crashes and fatalities across the State.
3. The dashboard is designed to achieve several key objectives through the consolidation of fragmented datasets and workflows into a single platform:

Key Objectives

5. A dedicated Citizen Portal has been conceptualized to enhance public participation and transparency, with features including:
 - Overview of accidents and fatalities
 - Registration of complaints and grievances
 - Submission of suggestions and feedback
 - Preliminary reporting of accidents
6. This initiative marks an important milestone in Odisha's journey towards an integrated, transparent, and accountable road safety management system. It seeks to pave the way for safer roads, significantly reduce preventable loss of life, and ensure that every citizen of Odisha can Come Home Safe.

With road safety embraced as a collective responsibility, these efforts will contribute meaningfully towards realizing the State's vision of **Viksit Odisha 2036**.
