

Request for Proposal ('RFP') For Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS) for Office of the Transport Commissioner, Odisha

Published on: 14/11/2023

Tender No. LXVII-424/2022/R.S./T.C – 16953

Contents

1	Response to the queries raised by the bidders	2
2	Corrigendum - III	161
3	Annexure (1) – Volume 2: 2.1 Revised Proposed Solution	175
4	Annexure (2) – Volume 2: 3.3 Hardware Components – Revised Technical Specifications	180
	3.3.1 ANPR Cameras	180
	3.3.2 Speed Violation Detection Radar	181
	3.3.3 Video Analytical Camera for Traffic Violation detection	183
	3.3.4 Pole Security Camera.....	188
	3.3.5 Junction box.....	190
	3.3.6 Surge Protector.....	191
	3.3.7 Local Processing Unit (LPU)	191
	3.3.8 Integrated Power Rack	193
	3.3.9 Industrial Managed PoE + Switch.....	195
	3.3.10 Online UPS	196
	3.3.13 Solar Power Unit (New Addition)	203
	3.3.13 Storage System (New Addition).....	204
	3.5.4 Backbone Engine for Secured Network.....	206
	3.5.5 Network Intrusion Prevention System.....	209
5	Annexure (3) – Volume 1: 3.5 Revised Pre-Qualification	215
6	Annexure (4) – Volume 1: 3.6. Revised Technical Bid Evaluation.....	223
7	Annexure (5) - Volume 1: 9.5. Annexure 5: Form II- PQ Bid Checklist.....	228
7.1	Annexure (6) - Volume 1: Annexure 20: Revised Price Bid Format list	239
8	Annexure (7) – Volume 2: 7 Revised Project Timeline & Payment Milestones	248
9	Annexure (8) – Volume 2: Upgradation of CCC to UCCC	251
10	Annexure (9) – Volume 2: List of Locations	264
11	Annexure (10) – Volume 1: BG format for EMD	265

1 Response to the queries raised by the bidders

Sr	RFP Page No.	RFP Clause No.	Clause Title	Queries / Clarification Sought	Response
1.	9	BID Datasheet	Earnest Money Deposit	we seek clarification on whether a Bank Guarantee, as is standard practice, would be acceptable in lieu of the Demand Draft for the Earnest Money Deposit (EMD) of Rs. 1,00,00,000, to make the process more accessible and in line with common bidding procedures.	Please refer to Corrigendum III : Sr. No. - 14, 15
2.	19	2.6	Earnest Money Deposit (EMD)	Bidder will submit their bids along with EMD in shape of Bank Draft/PBG issued by any Nationalized Bank drawn in favor of Transport Commissioner Odisha, Payable at Cuttack.	Please refer to Corrigendum III : Sr. No. - 14, 15
3.	26	3.5	PQ-3(Technical Capability)	<p>The bidder/any member of consortium must have experience in implementation of at least following numbers of similar assignments of project and value specified herein:</p> <ul style="list-style-type: none"> - One project of similar assignment in video surveillance, not less than the amount ₹40,00,00,000/- (Forty Crore Only) OR Two projects of similar assignment in video surveillance, each project must not less than the amount ₹30,00,00,000/- (Thirty Crore Only) OR Three projects of similar assignment in video surveillance, each project must not less than the amount ₹20,00,00,000/- (Twenty Crore Only) <p>The "Similar assignment" of the work shall mean project including procurement, supply, installation and providing dedicated network connectivity, power supply connectivity, and maintenance of video Surveillance through Video Management system/ Video analytics through camera/Radar or both in India with any state / central government /PSUs in last 7 years as on date of publication of bid.</p>	Please refer to Annexure - 3

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

Sr	RFP Page No.	RFP Clause No.	Clause Title	Queries / Clarification Sought	Response
				Note: The Bidder/The Lead Bidder need to specify the project/s for evaluation	
4.	26	3.5	PQ-3(Technical Capability)	<p>Bidder/Consortium shall submit:</p> <ul style="list-style-type: none"> • Copy of Work Order/agreement having the scope of work, client details and project value. • Completion/Substantial completion certificate on installation and verification (Minimum 80% of Capex Project Cost)/Phase wise completion along with value of completed work/Go live issued excluding O & M cost, signed by the authorized signatory of the client entity on the entity's Letterhead or certificate from Chartered Accountant /Statutory Auditor mentioning that the mentioned project work has been completed successfully along with scope and cost of the project 	Please refer to Annexure - 3
5.	34	3.11	Performance Bank Guarantee	Request you to change the PBG value to 3%	Please refer to Corrigendum III : Sr. No. - 12
6.	64	9.5	Annexure 5	The whole table is not in line with section 3.5 of volume 1 need to revise the same	Please refer to Annexure - 2
7.	90	--	--	Price spec for multilane speed display is not mentioned in the BOQ pole mounted camera will only be useful for a (1+1) lane road. Multilane road will require gantry monted structure.	Please refer to Annexure - 6
8.	90	--	--	No line item for power utility cost in the utility services [B] section of the price bid format in line with the scope of work Vol 2 - 3.8.1	Please refer to Annexure - 6
9.	90	--	--	No line item for mentioning insurance cost [B] section of the price bid format in line with the instruction to bidders Vol 1 - 5.21 -- Subtotal of Operations and Maintenance of the IEMS Solution.	Please refer to Annexure - 6
10.	11	2.1	Proposed solutions	Extension period mentioned as 3 years	Please refer to Corrigendum III : Sr. No. - 2
11.	11	2.1		On successful validation offence details will be processed through e-Challan system. An SMS will be sent to the violators on their registered mobile number	The IEMS solution will be integrated with VAHAN 4.0 and e-challans will be

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

Sr	RFP Page No.	RFP Clause No.	Clause Title	Queries / Clarification Sought	Response
				mentioned in VAHAN 4.0. Which server will generate the SMS Vahan server or the UCC software. Who will generate the sms and challan ? Whose Responsibility ? It should ideally be NIC server because because they generate the chalan or create sms.? Please confirm	generated from e-Challan solution deployed by NIC. NIC will facilitate required supports for integration. However, the MSI/Successful Bidder will be responsible for coordination with NIC time to time for desired functionalities.
12.	14	2.4	Important Instructions for the MSI	The provisions of the said paragraph are not in line with the provisions of vol2. - Sec 3.8.1 (Electrical power supply).	The MSI shall be responsible for providing redundant power and maintain SLA as defined in the RFP. Redundant power may be solar power arrangement for unreliable power locations integrated with UPS or a continuous power source.
13.	52	3.3.10	Online UPS	please add spec for the software/utility to monitor the Online UPS	Please refer to Annexure - 2
14.	87	3.8.2	Network connectivity	Please modify the bandwidth requirement to 30mbps for gantry locations and UCCC bandwidth requirement should be inline with the corresponding gantry bandwidth and locations.	Please refer to Corrigendum III : Sr. No. - 7
15.	27	3.2.3	SVD system overspeeding Point 2	The minimum speed for accuracy should be atleast 300 kmph	Please refer to Corrigendum III : Sr. No. - 8
16.	28	3.2.3	SVD system overspeeding Point 7	Please remove the video requirement in the speeding event. And the requirement for images should be 2- 5. "The display window for each event should feature a cropped image of the vehicle's number plate, captured at the time of the overspeeding incident. Additionally, this window should include two to five snapshots from the ANPR (Automatic Number Plate Recognition) camera linked to the event, providing secondary evidence and ensuring clear visibility of the number plate based on the time it was captured."	Please refer to Corrigendum III : Sr. No. - 8

Sr	RFP Page No.	RFP Clause No.	Clause Title	Queries / Clarification Sought	Response
			commissioning and mounting on structure)		
27.	26	3.2	3.2.2 Automatic Number Plate Recognition (ANPR) System	1. The System should automatically detect a vehicle in the camera view using video detection and activate Registration plate recognition. One ANPR camera shall be utilized for up to 4 lanes of road for doing ANPR.	Please refer to Annexure - 2
28.	27	3.2	3.2.2 Automatic Number Plate Recognition (ANPR) System	10. The system should be capable of providing all the above functionality on multi lane (up to 8 (4+4) Lane) with simultaneous incident detection and recording.	Please refer to Annexure - 2
29.	28	3.2	3.2.3 Speed Violation Detection (SVD) System (Over speeding)	4. The system should have been certified/tested by a reputed Indian test laboratory or institute under central government. Such certificate/test report should be submitted along with bids.	Please refer to Annexure - 2
30.	33	3.2	3.2.11 Artificial Intelligence (AI) and Deep Learning (DL) based IEMS.	5. The system should be capable of multi lane (up to 8 Lane (4 + 4 Lane)) functioning with simultaneous incident detection and recording.	Please refer to Annexure - 2
31.	41	3.3	3.3.2 Speed Violation Detection Radar	4. Frequency: 76-81 GHz integrated CMOS transceiver	Please refer to Annexure - 2
32.	42	3.3	3.3.2 Speed Violation Detection Radar	12. Certificates: OIML D11, OIML R91, FCC, BIS, IEC 60068-2-31	Please refer to Annexure - 2
33.	48	3.3	3.3.7 Local Processing Unit (LPU)	1. Camera interface : USB, 2 x CSI2 - 2 Lanes, 1 x CSI2 - 4 Lanes, 1x FPD Link III , 1x GMSL 2. USB : 2x USB 2.0, 1x USB 3.0 (Nano, TX2 NX) / 3.1 (Xavier NX) 3. Network Connectivity: Gigabit Ethernet Wi-Fi 802.11 a/b/g/n/ac & BT 5.0 4. Storage : M.2 M key slot for NVMe SSD card 256 GB, 6GB HDD 5. Display: HDMI 2.0 6. Audio: HDMI 2.0, DMIC / I2S via Expansion Header, Bluetooth	Please refer to Annexure - 2

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

Sr	RFP Page No.	RFP Clause No.	Clause Title	Queries / Clarification Sought	Response
				7. Peripherals Support / Other Interfaces : CAN (Xavier NX, TX2 NX), UART Debug, 9-axis IMU Sensors 8. Expansion Header : I2C, I2S, SPI, GPIOs, Reset and Power 9. Input DC Supply: 12V/5A to 24V/2.5A 10. Dimension : 125mm (L) x 90mm (W) 11. Operating Temperature: -20 to 850C	
34.	64/65	9.5	9.5.Annexure 5: Form II- PQ Bid Checklist	PQ-3 Technical Capability: The bidder should have similar project experience related to City/statewide surveillance/safe city project in India with any state/central government/PSUs in last 7 years as on date of release of this RFP. • One project of minimum 1000 Nos. of ANPR camera • One project of minimum 100 Crores	Please refer to Annexure - 5
35.	25	3.5	Annual Turnover	Requesting to Amend the clause as: The bidder/lead member of the consortium should have an average annual turnover of minimum INR 150 75 Crores in last 3 audited financial years (2023-2022, 2022-2021, 2021-2020). In the case of consortium, the member of consortium should have an average annual turnover of minimum INR 12.50 Crores in last 3 audited financial years (2023-2022, 2022-2021, 2021-2020). The net worth of the bidder/all members of consortium must be positive in the last three financial years (2023-2022, 2022-2021, 2021-2020) ending on 31st March 2023.	RFP Clause Prevails
36.	29	3.6	A1 Financial Competency	Requesting to Amend the clause as: The bidder/lead member of the consortium should have an average annual turnover of minimum INR 150 75 Crores in last 3 audited financial years (2023-2022, 2022-2021, 2021-2020).	RFP Clause Prevails

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

Sr	RFP Page No.	RFP Clause No.	Clause Title	Queries / Clarification Sought	Response
				> 75 Crore <= 100 Crore 5 marks > 100 Crore <= 125 Crore 10 marks > 125 Crores 15 marks	
37.	30	3.6	B.2 Networking Experience	Requesting to Amend the clause as: The bidder/any member of the consortium should have similar experience of single project for providing network connectivity across minimum 15 10 highway locations or remote locations for any state / central government / ULB / Smart City or Municipal Corporation in India in last 7 years as on date of release of bid. For this criteria, similar experience means a Secured, Point to Point /MPLS network connectivity, having multi redundant paths from each field node. Please note that a project implemented within the same city area limits shall not be considered as a remote location.	Please refer to Annexure - 4
38.	27	3.5	PQ-4, OEM Certificate The letter from respective OEM should also confirm about the authorization of the products quoted are not end-of-life for further period of 7 years.	We request authority to delete this sub-line as it is less feasible to get/provided by OEM.	RFP Clause Prevails
39.	31	3.6	C1 Product Technical Compliance The Radar system should capture the speed of vehicles running up to the speed of 180 KMPH with an accuracy of at least 99%. Speed Detection Capacity in kmph Marks > 180 <= 240 6 > 240 <= 280 8 > 280 10	C1 Product Technical Compliance The Radar system should capture the speed of vehicles running up to the speed of 180 KMPH with an accuracy of at least 99% more than 97%.	Please refer to Annexure - 4

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

Sr	RFP Page No.	RFP Clause No.	Clause Title	Queries / Clarification Sought	Response
			<p>in kmph Marks > 180 <= 240 6 > 240 <= 280 8 > 280 10</p> <p>The bidder/consortium member shall submit valid certification copy from any NABL accredited laboratory of Government of India or registered under CMV Rules 126.</p>	The bidder/consortium member shall submit valid certification copy from any NABL accredited laboratory / ARAI certificate of Government of India or any International standard certificate of radar country of origin equivalent to check the technical competency or registered under CMV Rules 126.	
40.	9	3.7	3.7 Operations and Maintenance of the IEMS Solution	<p>Requesting to Amend the clause as:</p> <p>"Rs.1,00,00,000 (One Crore Rupees Only), in form of Demand Draft / Bank Guarantee issued by any Nationalized / Scheduled commercial Bank drawn in favour of Transport Commissioner, Odisha payable at Cuttack valid for 180 days from the date of submission of bid."</p>	Please refer to Corrigendum III : Sr. No. - 14, 15
41.	34	3.11	3.11. Performance Bank Guarantee	<p>Requesting to Amend the clause as:</p> <p>1. The PBG (10% 3% of total contract value) shall be submitted within 15 days of notification of award done through issuance of Letter of Intent valid for the entire period of the project and six months thereafter i.e., five years and six months. Transport Commissioner, Odisha shall facilitate the signing of contract within the period of 15 days of notification of award. However, it is to be noted that the date of commencement of project and all contractual obligations shall commence from the date of issuance of letter of intent, whichever is earlier. All reference timelines as regards execution of project and payments to bidder shall be considered as beginning from date of issuance of letter of acceptance, whichever is earlier.</p>	Please refer to Corrigendum III : Sr. No. - 12

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

Sr	RFP Page No.	RFP Clause No.	Clause Title	Queries / Clarification Sought	Response
42.	64	9.5	9.5. Annexure 5: Form II- PQ Bid Checklist	Request to change 9.5. Annexure 5: Form II- PQ Bid Checklist as per 3.5. Pre-Qualification	Please refer to Annexure - 5
43.	72	9.9	9.9. Annexure 9: Manufacturer Authorization Form (MAF)	Note: This letter of authority should be on the letterhead of the manufacturer of respective item and should be signed by a person competent and having the power of attorney.	RFP Clause Prevails
44.	102	7	7 Project Timeline & Payment Milestones Milestones: M7 Payment Schedule: 5% of Work Order Value (Capex Cost) Time Schedule: D1 + 26 Weeks	We understand Timeline for implementation will be 6.5 months as mentioned in this sub-chapter (i.e., D1 + 26 Weeks wherein D1 is 'Date of Issue of Work Order'). Please confirm.	Please refer to Annexure - 7
45.	82	3.7	The development and implementation of the application shall be completed and commissioned by MSI in 4 months from the date of signing of agreement contract with MSI and shall be ready for Go live across all the locations with all desired functionalities.	We understand Timeline for implementation will be 6.5 months as mentioned in this sub-chapter (i.e., D1 + 26 Weeks wherein D1 is 'Date of Issue of Work Order'). Please confirm.	Please refer to Annexure - 7
46.	90	4.1	The successful bidder shall hand over the system within 5 months / 20 Weeks from date of issue of Work Order.	We understand Timeline for implementation will be 6.5 months as mentioned in this sub-chapter (i.e., D1 + 26 Weeks wherein D1 is 'Date of Issue of Work Order'). Please confirm.	Please refer to Annexure - 7
47.	31	3.6	D1 Proof of Concept (PoC) Total 35 Marks Evaluation committee will study the functionality and	We understand the objective of authority to evaluate the proposed solution before work order. However, Proof-of-Concept (PoC) with hardware, connectivity, and electricity on site that to within short timeframe and for short duration is almost impossible wherein focus will be	Please refer to Annexure - 4

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

Sr	RFP Page No.	RFP Clause No.	Clause Title	Queries / Clarification Sought	Response
			award marks for the demonstration and Proof of Concept (PoC) Demo Hardware in Line with the specifications 5 Marks Uninterrupted Redundant network 5 Marks Uninterrupted redundant Power supply 5 Marks	on hardware deployment part rather than focusing on solution capabilities part. Hence, we strongly request authority to conduct a presentation on demonstration of proposed software by bidder and it's OEM at other site locations wherein authority can evaluate bidder's capability in order to understand the solution and OEM's software capabilities which is proposed by bidder.	
48.	9	2	The Bidder shall upgrade the existing command and control centre to a Unified Command and Control Centre (UCCC) for traffic violation detection with integrated solution for issuance of challan through e-Challan system developed by NIC.	Please provide in-line clarification on below points as it is required to design the solution in detailed, 1. Do we need to just integrate with existing e-challan system developed by NIC and NIC e-challan software will issue the e-challan afterwards? 2. Does existing e-challan system/software is deployed on cloud or it is on-prime hosting arrangement? 3. We understand tasks such as manual cross-validation of enforcement event, print of e-challan, courier of e-challan is in department (either Police or Odisha state transport department) scope at CCC. Please confirm. 4. We understand existing e-challan system will be used across the project tenure to issue e-challan. Please confirm.	NIC e-Challan Software will issue e-Challans. Manual Cross-validation (adjudication) will be conducted by MSI. Print of e-Challan, courier of e-Challan will be done by Office of Transport Commissioner.
49.	83	3.7	The MSI will deploy the Operations Support resources for accomplishing the IEMS scope of work and shall ensure successful	E-challan system is used of existing software system. Does bidder needs to provide resource to issue e-challan at UCCC? If Yes, does these manpower are additional apart from UCCC Operator asked in the tender and call centre	Please refer to Annexure - 8

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

Sr	RFP Page No.	RFP Clause No.	Clause Title	Queries / Clarification Sought	Response
			generation of traffic challans.	manpower? We understand printer, pages, etc. required is in department scope to generate e-challan including courier (if required)	
50.	102	7	Note: The 10% of the of Capex for Software would be paid to the bidder/the lead bidder (in case of consortium) proportionately over the operation and maintenance period on Quarterly basis, Post Go-Live. The Billing period of Hosting & maintenance Cost would begin after Go-Live.	The said clause is contradict the standard practices and it may discourage bidders to participate as it create more cashflow related hurdles results incremental cost of overall project cost. Hence, we request authority to release 10% of the Capex for software during implementation timeline.	Please refer to Annexure - 7
51.	88	9.2	[A] PRE-IMPLEMENTATION COST – CAPEX 1.1 Upgradation of CCC to UCCC 1 Lumpsum	The said scope is very open is nature. We request authority to define the scope w.r.t. hardware, and service. Please provide inline response of below points to design the solution, 1. Does bidder needs to use existing CCC space (300 sq. ft., mentioned in sub-clause 3.1.1, Page Number - 19 of Volume-2) or UCCC will be at different location? 2. If UCCC at different location, please clarify, 2A. what is area of new UCCC in sq. ft.? 2B. Basic civil infrastructure is available to design the new state-of-the-art UCCC? 3. Does other beautification scope such as interior, furniture, false ceiling, AC is in bidder's scope?	Please refer to Annexure - 8

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

Sr	RFP Page No.	RFP Clause No.	Clause Title	Queries / Clarification Sought	Response
				4. Does existing hardware is used to UCCC or new hardware is required? If new hardware is required, we request authority to define the exact Bill of Material of hardware needs to supply at new UCCC.	
52.	89	4.1	• For command control centre, setting up of video wall, including minor civil works (Drill, Cementing, Holes, painting, partitioning, flooring, labour etc. to fit the Video Wall).	<p>The said scope is very open is nature. We request authority to define the scope w.r.t. hardware, and service.</p> <p>Please provide inline response of below points to design the solution,</p> <p>1. 				who are amongst the top 5 for world-wide market share in terms of revenue as per IDC latest published quarterly report presence in the latest Magic Quadrant of Gartner. MSI is expected to attach the report along with the Technical Bid.	
177	30	3.6.	Technical Bid Evaluation	B.2) Networking Experience For this criteria, similar experience means a Secured, Point to Point network connectivity, having multi redundant paths from each field node.	Please refer to Annexure - 4
178	30	3.6.	Technical Bid Evaluation	B.3) Command and Control Centre The bidder/any member of the consortium should have design and implementation experience in procurement, supply, installation of command-and-control centre having video wall, enterprise management system, help desk for any state / central government / PSUs in India in last 7 years as on date of release of bid with project value	Please refer to Annexure - 4
179	26	3.2	3.2.2 Automatic Number Plate Recognition (ANPR) System	1. The System should automatically detect a vehicle in the camera view using video detection and activate Registration plate recognition. One ANPR camera shall be utilized for up to 4 lanes of road for doing ANPR.	Please refer to Annexure - 2
180	27	3.2	3.2.2 Automatic Number Plate Recognition (ANPR) System	10. The system should be capable of providing all the above functionality on multi lane (up to 8 (4+4) Lane) with simultaneous incident detection and recording.	Please refer to Annexure - 2
181	28	3.2	3.2.3 Speed Violation Detection (SVD) System (Over speeding)	4. The system should have been certified/tested by a reputed Indian test laboratory or institute under central government. Such certificate/test report should be submitted along with bids.	Please refer to Annexure - 2
182	33	3.2	3.2.11 Artificial Intelligence (AI) and Deep Learning (DL) based IEMS.	5. The system should be capable of multi lane (up to 8 Lane (4 + 4 Lane)) functioning with simultaneous incident detection and recording.	Please refer to Annexure - 2
183	41	3.3	3.3.2 Speed Violation Detection Radar	4. Frequency: 76-81 GHz integrated CMOS transceiver	Please refer to Annexure - 2
184	30	3.6.	Technical Bid Evaluation	B.1) Implementation Experience of video surveillance through camera/radar/both with analytics. The bidder/any member of the consortium should have	Please refer to Annexure - 4

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

Sr	RFP Page No.	RFP Clause No.	Clause Title	Queries / Clarification Sought	Response
			commissioning and mounting on structure)		
251	16	2	2.5 Common guidelines regarding compliance of systems / equipment	There are no such categories available for OEMs of Intelligent Enforcement Management Systems, who rank among the top 5 globally in terms of market share revenue, as per the latest quarterly report published by IDC and their presence in the latest Magic Quadrant of Gartner.	Please refer to Corrigendum III : Sr. No. - 1
252	26	3.2	3.2.2 Automatic Number Plate Recognition (ANPR) System	1. The System should automatically detect a vehicle in the camera view using video detection and activate Registration plate recognition. One ANPR camera shall be utilized for up to 4 lanes of road for doing ANPR.	Please refer to Annexure - 2
253	27	3.2	3.2.2 Automatic Number Plate Recognition (ANPR) System	10. The system should be capable of providing all the above functionality on multi lane (up to 8 (4+4) Lane) with simultaneous incident detection and recording.	Please refer to Annexure - 2
254	28	3.2	3.2.3 Speed Violation Detection (SVD) System (Over speeding)	4. The system should have been certified/tested by a reputed Indian test laboratory or institute under central government. Such certificate/test report should be submitted along with bids.	Please refer to Annexure - 2
255	33	3.2	3.2.11 Artificial Intelligence (AI) and Deep Learning (DL) based IEMS.	5. The system should be capable of multi lane (up to 8 Lane (4 + 4 Lane)) functioning with simultaneous incident detection and recording.	Please refer to Annexure - 2
256	41	3.3	3.3.2 Speed Violation Detection Radar	4. Frequency: 76-81 GHz integrated CMOS transceiver	Please refer to Annexure - 2
257	42	3.3	3.3.2 Speed Violation Detection Radar	12. Certificates: OIML D11, OIML R91, FCC, BIS, IEC 60068-2-31	Please refer to Annexure - 2
258	48	3.3	3.3.7 Local Processing Unit (LPU)	1. Camera interface : USB, 2 x CSI2 - 2 Lanes, 1 x CSI2 - 4 Lanes, 1x FPD Link III , 1x GMSL 2. USB : 2x USB 2.0, 1x USB 3.0 (Nano, TX2 NX) / 3.1 (Xavier NX) 3. Network Connectivity: Gigabit Ethernet Wi-Fi 802.11 a/b/g/n/ac & BT 5.0 4. Storage : M.2 M key slot for NVMe SSD card 256 GB, 6GB HDD 5. Display: HDMI 2.0 6. Audio: HDMI 2.0, DMIC / I2S via Expansion Header,	Please refer to Annexure - 2

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

Sr	RFP Page No.	RFP Clause No.	Clause Title	Queries / Clarification Sought	Response
				Bluetooth 7. Peripherals Support / Other Interfaces : CAN (Xavier NX, TX2 NX), UART Debug, 9-axis IMU Sensors 8. Expansion Header : I2C, I2S, SPI, GPIOs, Reset and Power 9. Input DC Supply: 12V/5A to 24V/2.5A 10. Dimension : 125mm (L) x 90mm (W) 11. Operating Temperature: -20 to 850C	
259	79	3.6	3.6.3 Provision for Storage & Recording Services	• The following storage requirements shall be fulfilled by the MSI as scope for the project: o 30 days storage of all the traffic surveillance camera feeds to be stored at UCCC and Flagged data (critical incidents) will be stored for approximately 90 days, permanent storage envisaged on secondary storage.	Please refer to Corrigendum III : Sr. No. - 5
260	15	1	1.1. General	The determination of the relationship of Parent(s) and/or Affiliate(s) with the Bidder shall be on the date 7 (seven) days prior to the last date of submission of the Bid. Documentary evidence to establish such relationship shall be furnished by the Bidder along with the Bid.	Please refer to the Sr. No. 14 - "Consortium" of "Glossary of Terms" mentioned at Page No. 12 of the RFP
261	19	2	2.6.Earnest Money Deposit (EMD)	1. Bidder will submit their bids along with EMD in shape of Bank Draft issued by any Nationalized Bank drawn in favor of Transport Commissioner Odisha, Payable at Cuttack	Please refer to Corrigendum III : Sr. No. - 14, 15
262	25	3	3.5. Pre-Qualification	PQ-1 Legal Entity Note: - Consortium/Joint Venture consisting of 1 Lead bidder and 1 Consortium Partner shall be allowed. Lead bidder of the consortium shall be responsible and accountable for the entire project. A consortium must be formed 7 days prior to the last date of the bid submission. Under no circumstances consortium shall be formed after the last date of the bid submission.	Please refer to the Sr. No. 14 - "Consortium" of "Glossary of Terms" mentioned at Page No. 12 of the RFP

294	Volume:1 46	6.7	Patent / Intellectual Property Rights (IPR) / Copy Rights	The Master System Integrator along with Software OEM will be responsible to provide full documentation and sample codes used in the project by way of open APIs, SDKs and other tools, documentation etc. so that the customer/nominated agency on their behalf can carry out any customization, software development, changes in UI/UX etc. as may be needed as per their needs. In addition, the System Integrator along with Software OEM must provide an undertaking to enter into a software escrow agreement without any pre- conditions which is to cover server & client-side codes as below – a. Server software: Source code of the dataflow of the software architecture including interconnects of all the necessary kernel modules and model files for customization. b. Authority software: Source code of the Authority software to interface for GUI customization.	The Source code of all the bespoke / custom developed software code, data, algorithms, documentation, manuals, any other documents generated as a part of implementation of this project shall be handed over to the Transport Commissioner, Odisha. Authority shall have all rights to use the Source Code of bespoke / custom developed software for IEMS project.
295	Volume:1 90	9.2	6.3 Networking Components	Hybrid WAN Link aggregator (Inbound / Outbound) Hub Unit	Please refer to Annexure - 2
296	Volume:1 90	9.2	6.3 Networking Components	Hybrid WAN Link aggregator (Inbound / Outbound) Hub Unit	Please refer to Annexure - 2
297	Volume:2 70	3.5.3	1. Hardware	Should be appliance-based solution with purpose built hardware on HA for high performance ILL/MPLS/SDWAN Link aggregation & Load balancing, LTE-4G/5G-Sim Link aggregation and Inbuilt module to support multiple sim cards simultaneously on demand, WAN smoothing, Hot Fail over and multi access NMS module along with real-time analytics dashboard of the same OEM	Please refer to Annexure - 2
298	Volume:2 70	3.5.3	2. Traffic Management	Support using an USB 3G/4G/LTE modem as WAN from day one and 5G on demand using same hardware to deliver seamless services if all WAN link goes down.	Please refer to Annexure - 2
299	Volume:2 70	3.5.3	1. Hardware	Support at least 20 Gbps bandwidth throughput	Please refer to Annexure - 2

401	Page# 8 of Vol-2	1.2	Integration with e-Challan, Vahan 4.0 and Sarathi 4.0 for data access along with CCTNS, ERSS, Highway Patrol, Interceptors, IRAD, VLT for data access and transactions.	Kindly clarify the integration scope in details.	The UCCC software shall be able to integrate with existing systems and solutions like e-Challan, Vahan 4.0 and Sarathi 4.0 for data access along with CCTNS, ERSS, Highway Patrol, Interceptors, IRAD, VLT for data access and transactions. The Transport Commissioner's office will provide the MSI with the necessary permissions and information, but the MSI will have to coordinate with the relevant agencies to ensure successful integration.
402	Page# 9 of Vol-2	2	Any future scope of violations as added by Office of the Transport Commissioner from time to time.	Kindly clarify the possible use cases that might be asked in future	The IEMS solution shall be able to scaled up with violation detections as instructed by the office of the Transport Commissioner.
403	Page# 9 of Vol-2	2	System parameters for components such as utilization of Database Server, Recorder Servers, Local Workstation, and Storage System (all available storages). The dashboard should also	We understand, this should be provided by the NMS or EMS system. Please confirm	RFP Clause Prevails

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

Sr	RFP Page No.	RFP Clause No.	Clause Title	Queries / Clarification Sought	Response
			show the parameters such as CPU Core Usage, RAM Utilization and Storage Utilization.		
404	Page# 12 of Vol-2	2.1	There should be additional provisions in IEMS to capture incidents like Traffic Congestion Detection at Gantry/Cantilever Locations and Accidents/On road Vehicle stranded/Abandon Vehicle parked on road for a longer period within the limitation of gantry location, using live/recorded camera feeds at remote monitoring units and/or Unified Command and Control Centre. The system should be scaled up in the future to have an incident management system to identify the breakdown failure of components.	Kindly confirm whether this solution needs to be considered at all locations & required from day-1.	The IEMS solution shall be able to scaled up with violation/incident detections as instructed by the office of the Transport Commissioner.
405	Page# 13 of Vol-2	2.3	The source code of the custom developed application for IEMS should be handed over to the Office of the Transport Commissioner during the time of go-live.	We understand this clause is not applicable to COTS solutions. Kindly confirm.	The Source code of all the bespoke / custom developed software code, data, algorithms, documentation, manuals, any other documents generated as a part of implementation of this project shall be handed over to the Transport Commissioner, Odisha. Authority shall have all rights

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

Sr	RFP Page No.	RFP Clause No.	Clause Title	Queries / Clarification Sought	Response
					to use the Source Code of bespoke / custom developed software for IEMS project.
406	Page# 13 of Vol-2	2.3	The system should allow the operator to create a continuous recording schedule for the camera based on the time of day and day of week. It should be possible to set the camera recording schedule for a single camera or a group of cameras or all cameras.	We understand the continuous recording is required in DC & DR for all cameras including ANPR camera , Pole security cameras & analytics cameras. Kindly confirm the understanding.	Please refer to Corrigendum III : Sr. No. - 5
407	Page# 14 of Vol-2	2.4	10. The offending events shall be stored in the storage for 3 three years for any legal requirement. All the data shall be archived in every three months duration for proper space utilization.	As we understand , for Violation events with image snap & video clip needs to be stored for 3 years. Kindly confirm.	Please refer to Corrigendum III : Sr. No. - 5
408	Page# 15 of Vol-2	2.5	Critical core components of the system should not have any requirements to have proprietary platforms and should conform to open standards.	Kindly include the following : "The proposed IEMS software should be agnostic to camera brand & ONVIF profile S, G , T & M compliant to ensure software platform being an open standard."	RFP Clause prevails
409	Page# 19 of Vol-2	3.1	Under DEESHA project, Command and Control Centre (CCC) has been set up in an approximate area of 300 Sq Ft. at Bhubaneswar by the Office of the Transport	We undersrand the seamless integration of the new and existing system should be in such a way that it should provide unification of services such as failover redundancy with the existing hardware, software and application stack without any downtime. Kindly confirm.	Please refer to Annexure - 8

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

Sr	RFP Page No.	RFP Clause No.	Clause Title	Queries / Clarification Sought	Response
			Commissioner. Presently, CCC is used by the Office of the Transport Commissioner for monitoring traffic violations identified through DEESHA Project.		
410	Page# 24 of Vol-2	3.1	MSI shall be responsible for upgrading the existing command and control centre including but not limited to hardware and software components to a Unified Command and Control Center (UCCC) which will be capable of processing live feeds from the identified locations.	We understand that the system should provide unified interface for monitoring cameras, assignment of analytics, monitoring of analytics alerts, system health alerts for the new and existing system. The system should also have all the recorded data (continuous video feeds, VA alerts, flagged videos, system audit logs, operator permissions, etc.) preserved and available from day one. Kindly confirm the understanding.	Please refer to Annexure - 8
411	Page# 26 of Vol-2	3.2	The System should automatically detect a vehicle in the camera view using video detection and activate Registration plate recognition. One ANPR camera shall be utilized for up to 4 lanes of road for doing ANPR.	We understand that One ANPR camera per lane needs to be considered for the project. Kindly confirm the understanding.	Please refer to Annexure - 2
412	Page# 35 of Vol-2	3.2	All Interceptors deployed by State Transport Authority in State Toll Gates/e-detection system (in future as per requirements)	Kindly clarify the scope of integration for interceptor solution & Toll gates system	The UCCC solution shall have capability of integration with other third party solutions/systems like towing system, Highway police in case of accidents, interceptor vehicles, Toll gates system etc. The UCCC solution shall have capability of capturing

423	25	3.5	PQ-1(Legal Entity)	The bidder/members of consortium must be a company registered in India under Indian Companies Act 1956/2013, since last 3 years as on date of publication of bid.	RFP Clause Prevails
424	26	3.5	PQ-3(Technical Capability)	<p>The bidder/any member of consortium must have experience in implementation of at least following numbers of similar assignments of project and value specified herein: -</p> <p>One project of similar assignment in video surveillance, not less than the amount ₹40,00,00,000/- (Forty Crore Only)</p> <p>OR</p> <p>Two projects of similar assignment in video surveillance, each project must not less than the amount ₹30,00,00,000/- (Thirty Crore Only)</p> <p>OR</p> <p>Three projects of similar assignment in video surveillance, each project must not less than the amount ₹20,00,00,000/- (Twenty Crore Only)</p> <p>The “Similar assignment” of the work shall mean project including procurement, supply, installation and providing dedicated network connectivity, power supply connectivity, and maintenance of video Surveillance through Video Management system/ Video analytics through camera/Radar or both in India with any state / central government /PSUs in last 7 years as on date of publication of bid.</p> <p>Note: The Bidder/The Lead Bidder need to specify the project/s for evaluation</p>	Please refer to Annexure - 3
425	29	3.6	Technical Bid Evaluation	The totals in the summary table of A,B,C,D are not In-line with the totals of detailed table below	Please refer to Annexure - 4

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

Sr	RFP Page No.	RFP Clause No.	Clause Title	Queries / Clarification Sought	Response
426	31	3.6 (C.1)	Certificate of speed violation detection		Please refer to Annexure - 4
427	64	9.5	Annexure 5	The whole table is not in line with section 3.5 of volume 1 need to revise the same	Please refer to Annexure - 5
428	90	--	--	Price spec for multilane speed display is not mentioned in the BOQ pole mounted camera will only be useful for a (1+1) lane road. Multilane road will require gantry mounted structure.	Please refer to Annexure - 6
429	11	2.1		Could you please confirm which server is responsible for generating SMS and challans? Is it the Vahan server or the UCC software? Ideally, this function should be attributed to the NIC server, given that they are typically responsible for challan generation and SMS creation. Your confirmation on this matter would be appreciated.	The IEMS solution will be integrated with VAHAN 4.0 and e-challans will be generated from e-Challan solution deployed by NIC. NIC will facilitate required supports for integration. However, the MSI/Successful Bidder will be responsible for coordination with NIC time to time for desired functionalities.
430	10	2	Terms of reference.	Ability to preview, view live or playback recorded videos. Is camera surveillance at all gantries for Road a part of the scope of supply ?	Yes, Camera Surveillance of roads shall be part of scope of work.
431	19	3.1.2 and 3.1.1	CCC scope of supply	1. Are there any available resources such as architectural diagrams, system integration maps, database access, and source code details that could aid in understanding the current setup and facilitate the integration process for the new UCCC platform? 2. Could you provide details on the make and model of the existing hardware and software at the CCC, along with any relevant integration protocols or standards	Please refer to Annexure - 8

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

Sr	RFP Page No.	RFP Clause No.	Clause Title	Queries / Clarification Sought	Response
				necessary for ensuring seamless integration and compatibility with the new UCCC platform? 3. In regards to the network infrastructure, could you share the network architecture diagram, data flow matrix, and information about the current capacity and performance of the CCC's systems? Additionally, is there an existing Annual Maintenance Contract for these systems, and how might the transition to UCCC impact these arrangements?	
432	27	3.2.3	SVD system overspeeding Point 2	The minimum speed for accuracy should be atleast 240 kmph	Please refer to Corrigendum III : Sr. No. - 8
433	28	3.2.3	SVD system overspeeding Point 7	"In cases of speeding events, the event window needs to display a cropped image of the vehicle's number plate. Additionally, it should feature two to four snapshots captured by the ANPR camera associated with the incident, providing clear visibility of the number plate and offering supplementary evidence based on the time of capture."	Please refer to Corrigendum III : Sr. No. - 8
434	42	3.3.3	Video analytics camera	Point no 5 : 4 MP	Please refer to Annexure - 2
435	9	2	Term of Reference	The command control centre should have features to other incident management as may be required by the Transport Commissioner from time to time without any additional cost to the project.	RFP Clause Prevails
436	9	2	Term of Reference	Using Mobile Phone while driving.	Using Mobile Phone while driving/riding any vehicle shall be part of scope of work
437	9	2	Term of Reference	Allow the operator to raise support ticket from the VMD client itself.	VMD client means OEM of the product and associated agencies.
438	25	3.2.1	Brief Overview of IEMS	The UCCC software shall have an incident tracking and management system to track data from different systems like, towing system, Highway police in case of accidents, interceptor vehicles etc to track all the incidents.	The UCCC solution shall have capability of integration with other third party solutions/systems like towing system, Highway police in case of accidents, interceptor vehicles, Toll gates system

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

487	20	3.1	3.1.1.1.1 Video Wall and Controller 19. Operating System Window 7- 64 bit	Support for windows 7 ended on 14th January 2020, Please refer link below : https://support.microsoft.com/en-us/windows/windows-7-support-ended-on-january-14-2020-b75d4580-2cc7-895a-2c9c-1466d9a53962 Please change the same to latest windows 64-bit version	The specification is provided for existing hardware available at CCC.
488	22	3.1	3.1.1.2 Desktop 16. OS Support Microsoft Windows 10 Professional	As the OS required should be pre-loaded (which could be Windows 10 Professional or higher), as per understanding the support is required for the pre-loaded OS. Is the understanding correct?	The specification is provided for existing hardware available at CCC.
489	24	3.1	3.1.1.4 Application Server 17. Operating System : Compatible with Microsoft Windows Server latest version Standard and datacenter Edition (32 bit and 64 bit), Ubuntu Latest version (32 bit and 64 bit) 18 Operating System : OS Ubuntu 18.4	In serial no. 17 a compatible Microsoft Windows server version, Ubuntu latest version are mentioned and in Serial No. 18 OS is mentioned as Ubuntu 18.4 Please clarify what OS is required for Application server?	The specification is provided for existing hardware available at CCC.
490	9	2	Section 2- Term of Reference	Allow the operator to raise support ticket from the VMD client itself	VMD client means OEM of the product and associated agencies.
491	10	2	Section 2- Term of Reference	Ability to preview, view live or playback recorded videos.	Continuous recording is required to be stored at UCCC
492	12	2	Section 2.2- Locations for installation	A minimum of 40 locations will be considered for implementation of IEMS	Please refer to Annexure - 6
493	12	2	Section 2.2- Locations for installation	This solution should be designed for zero interruption-based communication from the links between control room and cameras installed and spread over various locations across the state	Please refer to Annexure - 1
494	12	2	Section 2.2- Locations for installation	The bidder shall propose a cost of shifting of gantry or cantilever structure along with the installed devices.	The MSI shall submit unit rate of shifting and reinstallation of

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

Sr	RFP Page No.	RFP Clause No.	Clause Title	Queries / Clarification Sought	Response
				However, the cost will not be a part of the financial bid proposal. The bidder will also indicate a turnaround time of shifting of the structures to the new location	gantry or cantilever structure along with the devices installed on it. Please refer to the Financial Format.
495	13	2	Section 2.2- Locations for installation	At each location of IEMS implementation, MSI shall install following components for surveillance system:	Please refer to Annexure - 6
496	13	2	Section 2.3- General System Features	The source code of the custom developed application for IEMS should be handed over to the Office of the Transport Commissioner during the time of go-live.	The Source code of all the bespoke / custom developed software code, data, algorithms, documentation, manuals, any other documents generated as a part of implementation of this project shall be handed over to the Transport Commissioner, Odisha. Authority shall have all rights to use the Source Code of bespoke / custom developed software for IEMS project.
497	13	2	Section 2.3- General System Features	The system should allow the operator to create a continuous recording schedule for the camera based on the time of day and day of week. It should be possible to set the camera recording schedule for a single camera or a group of cameras or all cameras	Please refer to the Section 3.3.4 Pole Security Camera to understand the functionality of Pole Security Camera.
498	14	2	Section 2.3- General System Features	The system should be compatible with integration with interface of external systems such as DEESHA Command and Control Centre Application, and with other stakeholder application as and when desired by the authority	The Office of the Transport Commissioner will facilitate the required information and data from the concerned agencies. The MSI shall be responsible for coordination and successful integration at no additional cost for development to the Office of the Transport Commissioner.

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

Sr	RFP Page No.	RFP Clause No.	Clause Title	Queries / Clarification Sought	Response
499	14	2	2.4 Important Instructions for the MSI	The Command Control Centre will have dedicated primary- secondary link and MSI will be responsible to suggest the bandwidth capacity with due detailed explanation to the Office of the Transport Commissioner for uninterrupted and defect free operation and execution of the system on turnkey basis. The installation and commissioning of the application servers is the responsibility of MSI, to be hosted with managed cloud services.	Please refer to Corrigendum III : Sr. No. - 7
500	19	3.1	Section -3.1.1- Command and Control Centre (CCC)	Desktop	The specification is provided for existing hardware available at CCC.
501	19	3	Section -3.1.1 -Command and Control Centre (CCC)	Video Wall	Please refer to Annexure - 8
502	19	3	Section -3.1.1 -Command and Control Centre (CCC)	Online UPS	Please refer to Annexure - 8
503	19	3	Section -3.1.1- Command and Control Centre (CCC)	Application Server	Please refer to Annexure - 8
504	24	3	Section -3.1.2 -Unified Command and Control Centre (UCCC)	The MSI shall upgrade the existing CCC to the UCCC to ensure all required hardware like videowall, IT equipment, third party software, antivirus, firewall, etc. are seamlessly integrated on UCCC platform.	Please refer to Annexure - 8
505	24	3	Section -3.1.2 -Unified Command and Control Centre (UCCC)	The MSI shall set up operator workstations, network connectivity and software for processing traffic violations, power backups, firewall, antivirus licenses, etc.	Please refer to Annexure - 8
506	25	3	Section -3.2.1- Brief Overview of IEMS	The application which will be developed as part of IEMS project must be scalable and designed in such a way that during the project period, Office of the Transport Commissioner may increase the number of gantries or nodes and cameras to any extent without changing the core of the software engine or any part thereof, whereas only the required hardware infrastructure will be added or upgraded as per requirement and recommendation of competent authority	The MSI will be responsible for the customization of the solution as per the instruction and requirements of office of the Transport Commissioner.

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

Sr	RFP Page No.	RFP Clause No.	Clause Title	Queries / Clarification Sought	Response
507	25	3	Section 3.2.1.1 -License	All licenses must be perpetual, and ownership must lie with office of the transport commissioner	RFP Clause Prevails
508	26	3	Section -3.2.2- Automatic Number Plate Recognition (ANPR) System	The System should automatically detect a vehicle in the camera view using video detection and activate Registration plate recognition. One ANPR camera shall be utilized for up to 4 lanes of road for doing ANPR	Please refer to Annexure - 2
509	27	3	Section -3.2.2 -Automatic Number Plate Recognition (ANPR) System	The system should give an instant alert in such case (within 4 Sec). The system should also have the functionality to send the alert via email and SMS to designated email addresses at UCCC and mobile phone numbers of violators, if desired by the office of the Transport Commissioner, in the future	The Emails to be sent to the designated authorities of the office of Transport Commissioner by MSI. The SMS will be sent through eChallan System.
510	27	3	Section- 3.2.3- Speed Violation Detection (SVD) System (Over speeding)	The system should be an object frame rate & radar-based speed violation detection system shall be used for speed detection. MSI will make provision to install one radar which will accommodate up to 4 lanes on one side of road. One Radar for 4 lanes will ensure scalability of the system in case of future expansion of roads and it should be of advanced technology.	RFP Clause Prevails
511	28	3	Section 3.2.3- Speed Violation Detection (SVD) System (Over speeding)	The system should have an algorithm to calculate the segmental speed of a vehicle between two gantries/cantilevers.	RFP Clause Prevails
512	28	3	Section -3.2.4- Evidence Camera for detection of Traffic Violations	The Single Overview Cameras will be installed for up to 4 lanes on each side & integrated with AI (by software module) to detect any traffic violation and integrate the same with ANPR system and e-Challan system to generate challans.	Please refer to Annexure - 1
513	32	3	Section -3.2.9 -Riding without helmet by both rider and pillion rider system	The system should collectively identify the incident where helmet less riding for both the rider and the pillion, shall be detected	The system should collectively identify the incident where helmet less riding for both the rider and the pillion, shall be detected. This clause is applicable for the helmets meeting ISI and MVA standards.

3 Annexure (1) – Volume 2: 2.1 Revised Proposed Solution

The idea of having a vibrant and dynamic IEMS in place is envisioned keeping in mind that the numbers of vehicles are increasing day by day in the state. The rate of accidents involving drivers, riders and pedestrians on the roads increases due to negligence driving and over speeding.

Therefore, any traffic rules violations along the identified stretches will be captured through Cameras and Radars. The processed data will be transmitted to the UCCC, which will be hosted at cloud infrastructure. The Violator Vehicles details (like Mobile No., Address) will be validated with the VAHAN database. On successful validation offence details will be processed through e-Challan system. An SMS will be sent through e-Challan system to the violators on their registered mobile number mentioned in VAHAN 4.0.

The solution shall be developed by Master System Integrator (MSI), who shall be responsible for supply, development, customization, installation, testing and commissioning of the project along with operations and maintenance for the period of 5 years. Further, the operations and maintenance period may be extended up to 2 years on a yearly basis performance review of the MSI. The MSI shall be responsible for making the required arrangements for feeding data from field equipment and analyzing the data through IEMS Solution and presenting the interactive dashboard at Unified Command & Control Centre (UCCC) and other monitoring centers at selected RTO Offices & Police Stations.

The solution should also be capable of generating periodic, traffic violation wise and demographic MIS reports based on location, operator, number of enforcement cases, duration of the day, and other data parameters as per the requirements of the client. The MIS reports and dashboard shall be accessed through any RTO office locations or establishments under the purview of the Office of Transport Commissioner along with the police stations.

There shall have provisions to capture incidents like Traffic Congestion Detection at Gantry/Cantilever Locations and Accidents / On road Vehicle stranded / Abandon Vehicle parked on road for a longer period within the limitation of camera field of view, using live / recorded camera feeds at remote monitoring units and/or Unified Command and Control Centre. The system shall be scaled up in the future to have an incident management system to identify the breakdown failure of components.

Also, the application which will be developed as part of IEMS project must be scalable and designed in such a way that during the project period, Office of the Transport Commissioner may increase the number of IEMS locations or nodes and cameras to any extent without changing the core of the software engine or any part thereof, whereas only the required hardware infrastructure will be added or upgraded as per requirement and recommendation of competent authority.

The MSI shall develop a burglar/Anti-theft alarm system and analytics applications for deployment of intelligent analytics on the cameras/field equipment and raise alarms & triggers in case of offensive and unlawful activities (unauthorized opening of junction box, thefts, vandalism, etc.) within a periphery of gantries or nodes using alarms, hooters, and notifications.

The solution shall comprise of various field systems at IEMS locations, viz. ANPR system, Speed Violation Detection (SVD) System and Video Analytics for detection of traffic violations.

E-Challan system and other IT infrastructure available with legacy system at Central Control & Centre (CCC) shall be integrated with new upgraded Unified Command & Control Centre (UCCC) for successful operation of the IEMS.

ANPR system:

The ANPR System shall be used for monitoring vehicle flow at strategic locations. The system will support real-time detection of vehicles at the deployed locations, capture all vehicle, reading its number plate, database lookup from central server and triggering of alarms/alerts based on the vehicle status and category as specified by the database. The System will automatically detect the license plate in the captured video feed in real-time and then generate the Optical Character Recognition (OCR) of the license plate characters and forward this to UCCC for further processing. ANPR systems are also part of Speed Violation Detection & Video Analytics for Traffic Violation as sub-systems.

The ANPR Camera with IR will interface to LPU (place inside the Junction Box) and real time data of violating vehicles will be transferred to the UCCC via MPLS network. ANPR Camera should be able to detect Number plates of vehicle minimum 180 Kmph without any distortion of image.

In case ANPR system is unable to recognize the number plate for a vehicle, the image will be captured by the software for manual number plate recognition. No predictions or low confidence recognitions will be manually annotated by staff at the UCCC and fed back to improve the model. The software at the UCCC shall allow operators to zoom in, correct number plate recognized from the snapshot.

The ANPR camera shall correctly link the vehicle number plate with the any violation as detected by the radar or video analytical camera. They shall be operating in tandem where required. The ANPR camera shall be able to capture both retro & non-retro reflective number plates.

SVD system:

The SVD System shall be comprised of one Radar Unit with flasher and shall be interlinked with ANPR system. The Radar will detect the vehicles moving over threshold speed and trigger an alert to ANPR system to capture the details of offensive vehicles. The System shall detect the speed of vehicles as per the business rules defined by the office of the Transport Commissioner.

The Radar with Flasher will interface to LPU and LPU will process the data of violating vehicles and transmit the same to the UCCC via MPLS network.

Video Analytic System for detection of Traffic Violations:

This system shall be capable of video-based traffic violation detection and enforcement systems. The primary objective of the systems is to not only detect traffic violations but also impose enforcement on the violators through supporting evidence for generations of e-Challans.

The Video Analytics Camera will be installed for each lane on each side & integrated with AI (by software module) to detect any traffic violation and integrate the same with ANPR system and e-Challan system to generate challans. The cameras shall be capable of recognizing number plates of the vehicles. The Video Analytics Camera should be able to detect Number plates of vehicle minimum 180 Kmph without any distortion of image.

The system shall be capable of detection of offenses as listed below.

- Using Mobile Phone while driving.
- Driving against the flow of traffic.
- Driver and Passenger not wearing seat belt.
- Riding more than two people on a two-wheeler.
- Riding without helmet by both rider and pillion rider
- Vehicles abandoned on Road.
- Any future scope of violations as added by STA.

The system should have the ability to automatically count and classify traffic, providing valuable data for traffic management purposes.

Connectivity:

The ANPR, RADAR and evidence camera will interface to LPU, and real time data of violating vehicles will be transferred to the UCCC via MPLS network.

Indicative Field Equipment Setup:

1. **ANPR camera:** One dedicated camera for ANPR of the ongoing vehicles as well as capturing images of high-speed vehicles on the road. This camera shall be capable of capturing vehicles on all lanes (upto 3 lanes). The ANPR camera shall provide additional accuracy of capturing License number plates of all hi-speed vehicles running on the road.
2. **Speed Violation Detection Radar:** This shall be a multilane radar for detection of speed violation according to conditions mentioned in the tender. One Single radar shall be used for up to three lanes of road. SVD radar will be connected to ANPR camera which will capture images of vehicles.
3. **Video Analytics Camera for Traffic Violation Detection:** This camera shall be used for continuous monitoring of the road traffic and detection of listed video evidence according to the conditions mentioned in the tender. The MSI shall use this camera for doing ANPR of the vehicles on the road. One Camera shall be used per lane of road.
4. **Pole Security camera:** The Pole security camera mounted shall be used to do surveillance of the junction box and its adjoining area of interest to protect the equipment.

At each location of IEMS implementation, MSI shall install at least following components for surveillance system:

Lane classification	ANPR Camera	SVD Radar	Video Analytics Camera	Pole Security Camera	Total Monitoring Devices
2 Lane (1+1 Lane)	2	2	2	1	7
4 Lane (2+2 Lane)	2	2	4	1	9
6 Lane (3+3 Lane)	2	2	6	1	11

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

Indicative diagram of field equipment setups is as follows:

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

The bandwidth requirement at IEMS Locations:

Lane classification	ANPR Camera	Video Analytics Camera	Minimum Bandwidth
2 Lane	2 X 6 Mbps	2 X 3 Mbps	18 Mbps
4 Lane (2 Up & 2 Down)	2 X 6 Mbps	4 X 3 Mbps	24 Mbps
6 Lane (3 Up & 3 Down)	2 X 6 Mbps	6 X 3 Mbps	30 Mbps

Note: The bandwidth requirement provided is indicative.

- This solution should be designed for zero interruption-based communication from the links between control room and cameras installed and spread over various locations across the state.
- The number of nodes/locations including field devices and associated units as decided by Office of the Transport Commissioner may be increased during the award of contract or anytime during the project period and the quoted unit prices of items in the bid shall hold unchanged. No revision of unit prices will be considered for the additional nodes during the project period.
- At each location of IEMS implementation, MSI shall conduct Supply, Installation, Testing & Commissioning of field Devices with uninterrupted and redundant power supply and network services at a single IEMS location. The MSI shall be responsible for providing redundant power supply and maintain SLA as defined in the RFP. Redundant power may be solar power arrangement or a continuous power source.

4 Annexure (2) – Volume 2: 3.3 Hardware Components – Revised Technical Specifications

The MSI will be responsible for the compliance for each of the items and corresponding to the defined features mentioned herewith during procurement process.

3.3.1 ANPR Cameras

#	Feature	Technical specification	Revised Technical specification	Compliance (Yes/No)
1.	Image Sensor	1 inch" Progressive CMOS Global shutter or better	1/2.8" Progressive scan CMOS Global Shutter	
2.	Maximum Resolution	4112 x 2176 (8 MP) or better	4112 x 2176/ 3840 x 2160 (8 MP) or better	
3.	Lens Type	Fix or Full focus-focal	Fix or Full focus focal	
4.	Focal Length	25, 35, 50mm option to suit application. Lens must focus visible and infrared light at the same depth. F1.8 or better	22 / 32 / 50mm option to suit application. Lens must focus visible and infrared light at the same depth.	
5.	Aperture	F1.8 or better	F1.8 or better	
6.	Day/Night	Removable IR-cut filter for day & night function	Removable or fixed IR-cut filter for day & night function	
7.	Mono/Color	Color	Color	
8.	Effective Sensor Diagonal	16.1 mm or better	9.1 mm or better	
9.	Ingress Protection	Weather-proof IP66-rated housing or better Vandal-proof	Weather-proof IP66-rated housing or better Vandal-proof	
10.	Operating Temperature	0° C ~ 70°C or Better	Deleted	
11.	Shutter Time	1/1000 to 1/10,000 sec. or better	1/1000 to 1/10,000 sec. or better	
12.	Capture Range	35 meters or better	35 meters or better	

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

#	Feature	Technical specification	Revised Technical specification	Compliance (Yes/No)
13.	Power Input	DC 12V to 24V or PoE	DC 12V to 24V or PoE	
14.	Operating Temperature	Starting Temperature: 0°C ~ 60°C Working Temperature: -20°C ~ 60°C -5°C ~ 60°C, with optional cold start heater Suitable for Odisha weather conditions	0°C ~ 60°C suitable for Odisha weather conditions	
15.	Video Compression	Minimum 90%	Deleted	
16.	Interface	H.264 & MJPEG or better	MJPEG / H.264 / H.265 or better	
17.	Synchronization	Fast Ethernet (100 Mbit/s) Gigabit Ethernet (1000 Mbit/s)	Fast Ethernet (100 Mbit/s) or better	
18.	Exposure Time Control	Via hardware trigger Via software trigger Via free run Via hardware trigger Programmable via the camera API	Via hardware trigger Via software trigger Via free run Via hardware trigger Programmable via the camera API	
19.	Presence in India	Any globally reputed Manufacturer presence in India for more than 5 years.	Any globally reputed Manufacturer presence in India for more than 5 years.	

3.3.2 Speed Violation Detection Radar

#	Feature	Technical specification	Revised Technical specification	Compliance (Yes/No)
1.	Technology	Object tracking (range, angle, speed) with UHD resolution independent discrimination of multiple targets at same speed and range	Object tracking (range, angle, speed) with UHD resolution independent discrimination of multiple targets at same speed and range	
2.	Speed Range	Maximum Speed: 5 to 180 Km/H	5 Km/H to minimum 180 Km/H	
3.	Field of view	+/- 9 Degree (LRR), +/- 45 Degree (MRR),	+/- 9 Degree (LRR), +/- 45 Degree (MRR),	
4.	Frequency	76-81 GHz integrated CMOS transceiver	76-81 GHz integrated CMOS transceiver or any other band allowed by Government of India.	

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

#	Feature	Technical specification	Revised Technical specification	Compliance (Yes/No)
			The bidder shall provide certificate from WPC, Ministry of Communication (Dept of Telecommunication) for operating in license exempted bands permitted in India. The Radar Sensor proposed should be fully compliant to all frequency norms in India.	
5.	Interface	Ethernet/CAN	Ethernet/CAN/RS485	
6.	Housing	IP67	IP66/67	
7.	Simultaneous Tracking of Objects	200 or more	256 or more	
8.	Max. speed Detection Range	250 Mtr or more	250 Mtr or more	
9.	Operation Mode	Approaching Object detection	Approaching Object detection	
10.	Accuracy	99% or better	98% or better	
11.	Refresh Time	50msec or better, Multi lane operation	75msec or better, Multi lane operation	
12.	Certificates	OIML D11, OIML R91, FCC, BIS, IEC 60068-2-31	Valid certification from any NABL accredited laboratory / ARAI/ICAT/VRDE/GARC certificate of Government of India or Indian testing agencies in accordance Section 167A and rule 126 of the Central Motor Vehicle Rules (CMVR) 1989. FCC, IEC 60068-2-31	
Output				
13.	Output Format	Track object list	Track object list	
14.	Trigger	Range, Speed and Class based triggers (Remotely Configurable)	Range, Speed and Class based triggers (Remotely Configurable)	
15.	Classification	3 Vehicle classes (Further upgradable to 6)	4 Vehicle classes (Further upgradable to 6)	
16.	Ghost object removal	Yes	Yes	
17.	Presence in India	Any globally reputed Manufacturer presence in India for more than 5 years.	Any globally reputed Manufacturer presence in India for more than 5 years.	

3.3.3 Video Analytical Camera for Traffic Violation detection

#	Features	Technical specification	Revised Technical specification	Compliance (Yes/No)
1.	Sensor		1/2.8" or better	
2.	Sensor type		Progressive scan CMOS Global shutter	
3.	Resolution (H x V Pixels)		2560 × 1440 or better	
4.	Resolution		4 MP or better	
5.	Effective Sensor Diagonal		8.9 mm or better	
6.	Frame Rate (at Default Settings)		Mainstream (2560 × 1440@25/30fps) or better Sub stream (1920 × 1080@50/60fps) or better	
7.	Mono / Color		Color	
8.	Day/Night		Yes, IR Cut Filter	
9.	Image Data Interface		Fast Ethernet (100 Mbit/s)	
10.	Synchronization		Via hardware trigger Via software trigger Via free run	
11.	Exposure Time Control		Via hardware trigger Programmable via the camera API	
12.	I/O Lines		1 opto-coupled input line 1 opto-coupled output line 1 general purpose I/O (GPIO) line	
13.	Lens Mount		C-mount	
14.	Video Compression		MJPEG / H.264 / H.265 or better	
15.	Interface		Fast Ethernet (100 Mbit/s) or better	

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

#	Features	Technical specification	Revised Technical specification	Compliance (Yes/No)
16.	Operating Temperature		0°C ~ 60°C suitable for Odisha weather conditions	
17.	Presence in India		Any globally reputed Manufacturer presence in India for more than 5 years.	
18.	Image Sensor	1/1.8" CMOS (1.411 cm)	Deleted	
19.	Shutter Mode	Single shutter	Deleted	
20.	Electronic Shutter Speed	Auto/Manual 1/50 s–1/100,000 s	Deleted	
21.	Image Resolution	4112 x 2176 (8 MP) or better	Deleted	
22.	Noise Reduction	3D NR	Deleted	
23.	S/N Ratio	>50dB	Deleted	
24.	Min. Illumination	0.0001 lux	Deleted	
25.	Day/Night	Supports ICR auto switch: IR cut-off filter (IRCF) with the polarizing filter is used during the daytime, and switches to the common IR cut-off filter at night	Deleted	
26.	Focal Length	10mm–50mm Motorized	Deleted	
27.	Field of View	Horizontal: 9.4°–40.8° Vertical: 5.4°–22.9° Diagonal: 10.7°–46.9°	Deleted	

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

#	Features	Technical specification	Revised Technical specification	Compliance (Yes/No)
28.	Exposure Mode	Auto; Manual (Select from shutter values or customize shutter range)	Deleted	
29.	Gain Range	0-100	Deleted	
30.	Bit Rate Control	CBR; VBR	Deleted	
31.	Video Resolution	4M (2688 × 1520)/ 1080P (1920 × 1080)/ UXGA (1600 × 1200)/ 720P (1280 × 720)/ D1 (704 × 576)/CIF (352 × 288)	Deleted	
32.	Video Frame Rate	Mainstream (2688 × 1520@25/30fps), (1920 × 1080@50/60fps) Sub stream (1600 × 1200@25/30fps)	Deleted	
33.	Video Bit Rate	H.264: 32kbps–32767kbps; H.265: 32kbps–32767kbps; MJPEG: 512kbps–32767kbps	Deleted	
34.	Video Compression	H.265; H.264M; H.264H; MJPEG	Deleted	
35.	Picture Encoding Format	JPEG	Deleted	
36.	Auto Gain Control	Support	Deleted	
37.	Signal Processing	Digital Signal Process	Deleted	
38.	White Balance	Auto; Manual; Outdoor; Natural; Street Lamp; Partial white balance	Deleted	

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

#	Features	Technical specification	Revised Technical specification	Compliance (Yes/No)
39.	Bad Pixel Correction	Yes	Deleted	
40.	Edge Enhancement	Yes	Deleted	
41.	Composite Image	Supports combining up to 3 source images, and 1 close-up image into a composite image	Deleted	
42.	Trigger Mode	Video detection/radar*	Deleted	
43.	Storage	1, supports maximum 512 GB SD card local storage	Deleted	
44.	Alarm Event	Storage full, storage error, external alarm, no storage space, illegal access, and security fault	Deleted	
45.	Image Tampering Prevention	Verifies watermarks in videos and images	Deleted	
46.	Security	Authorized username and password, MAC address binding, HTTPS encryption, and network access control	Deleted	
47.	Auto Registration	Yes	Deleted	
48.	Effective Range	50mtr or better	Deleted	
49.	Detection Accuracy (min)	99%	Deleted	

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

#	Features	Technical specification	Revised Technical specification	Compliance (Yes/No)
50.	Capture Speed Rate	5 to 180 Kmph	Deleted	
51.	Network	1 × RJ-45 Ethernet port, 10/100/1000 M network transmission	Deleted	
52.	SDK and API	Yes	Deleted	
53.	RS-485	2, connecting to devices such as radar	Deleted	
54.	RS-232	2, con is used for serial debugging and R T G is for connecting to radars	Deleted	
55.	Audio Compression	G.711A; G.711Mu; G.726	Deleted	
56.	IR Distance	23 m–50 m or better (adjustable brightness)	Deleted	
57.	Protocol	HTTP, HTTPS, TCP/IP, UDP, ICMP, IGMP, FTP, DHCP, DNS, DDNS, PPPoE, NTP, SSL, RTP, RTSP, RTCP, UPnP, SMTP, SNMP, IGMP, QoS, 802.1X, IPv4 and IPv6, ONVIF (Profile S, Profile G, Profile T)	Deleted	
58.	Power Supply	12–36 VDC, PoE	Deleted	
59.	Power Consumption	≤ 13W	Deleted	
60.	Operating Temperature	-5°C to +65°C	Deleted	

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

#	Features	Technical specification	Revised Technical specification	Compliance (Yes/No)
61.	Operating Humidity	10%–90%	Deleted	
62.	Protection Grade	IP67	Deleted	
63.	Presence in India	Any globally reputed Manufacturer presence in India for more than 5 years.	Deleted	

3.3.4 Pole Security Camera

The Pole Security Camera shall be installed & integrated with AI (by software module) to detect any unwanted activity near IEMS locations and trigger alert to the UCCC. Moreover, if any node is disconnected, the system shall raise an alert to the UCCC & appropriate action shall be taken by MSI to rectify the same. The Alerts will also be transmitted to RTO offices & police stations nearer to the location on need basis. A monitoring station will be provided at RTO offices & police stations nearer to the location.

#	Feature	Technical specification	Revised Technical specification	Compliance (Yes/No)
1.	Camera Type	Varifocal Bullet Camera	Varifocal Bullet Camera	
2.	Image Sensor	1/2.8-inch CMOS or better	1/2.8 inch CMOS or better	
3.	Resolution	2 MP, Min. 1920 × 1080 at 50/60 FPS or better	2 MP, Min. 1920 × 1080 at 30 FPS or better	
4.	Video Compression	H.264, H.265	MJPEG / H.264 / H.265 or better	
5.	Audio Compression	G.711ulaw/G.711alaw/G.722.1/G.726/MP2L2/PCM/MP3/MJPEG, should support Environment Noise Filtering	G.711ulaw/G.711alaw/G.722.1/G.726/MP2L2/PCM/MP3/MJPEG, should support Environment Noise Filtering	
6.	Streaming	Min. three compressed stream (Individually Configurable)	Min. three compressed stream (Individually Configurable)	

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

#	Feature	Technical specification	Revised Technical specification	Compliance (Yes/No)
7.	ID/Password	Multi-level user ID/Password	Multi-level user ID/Password	
8.	Simultaneous Live View	Up to 6 channels	Up to 6 channels	
9.	Physical Layer	1 RJ45 10M/100M self-adaptive Ethernet port	1 RJ45 10M/100M self-adaptive Ethernet port	
10.	Security	Password protection, complicated password, HTTPS encryption, Stateful IP address filter	Password protection, complicated password, HTTPS encryption, Stateful IP address filter	
11.	Protocol	TCP/IP, ICMP, HTTP, HTTPS, FTP, DHCP, DNS, DDNS, RTP, RTSP, NTP, UPnP, SMTP, IGMP, 802.1X, QoS, IPv4, IPv6, UDP, Bonjour, SSL/TLS, PPPoE, ARP	TCP/IP, ICMP, HTTP, HTTPS, FTP, DHCP, DNS, DDNS, RTP, RTSP, NTP, UPnP, SMTP, IGMP, 802.1X, QoS, IPv4, IPv6, UDP, SSL/TLS, PPPoE, ARP	
12.	Lens Type	2.7 to 13.5 mm	2.7 to 13.5 mm	
13.	Alarm	2 inputs, 2 output	1 inputs, 1 output	
14.	Audio	1 inputs, 1 output	1 inputs, 1 output	
15.	Image Enhancement	BLC, HLC, 3D DNR	BLC, HLC, 3D DNR	
16.	Image Parameters Switch	Yes	Yes	
17.	Image Settings	Rotate mode, saturation, brightness, contrast, sharpness, gain, white balance adjustable by client software or web browser	Rotate mode, saturation, brightness, contrast, sharpness, gain, white balance adjustable by client software or web browser	
18.	Target Cropping	Yes	Optional	
19.	Illumination	Color: 0.002 Lux or better at (F1.4, AGC ON), 0 Lux with IR	Color: 0.002 Lux or better at (F1.4, AGC ON), 0 Lux with IR	
20.	Minimum Illumination	0.001 Lux 0 Lux with IR	0.001 Lux 0 Lux with IR

3.3.9 Industrial Managed PoE + Switch

#	Technical Specifications	Revised Technical Specifications	Compliance (Yes / No)
1.	L2 Managed Industrial Switch 16 ports 2X1G with 8x10/100/1000 Base-T PoE+ ports and additional 2x1G Base-X ports accommodate SM/MM FO Module.	L2 Managed Industrial Switch with 16x10/100/1000Base-T(X) P.O.E., 2xGigabit combo P.S.E. and 2x100/1000Base-X, SFP socket	
2.	Should support PoE as per IEEE 802.3af and 802.3at with PoE budget of 120W or better.	Should support PoE as per IEEE 802.3af and 802.3at with PoE budget of 240W or better.	
3.	Should have Minimum 20Gbps switching bandwidth and Min. 14Mbps Switch- forwarding rate. The switch should work Wire speed forwarding from day 1.	Should have Minimum 20Gbps switching bandwidth and Min. 14Mbps Switch- forwarding rate	
4.	Layer 2 Features: Should support STP, RSTP, MSTP, IGMP v1/v2/v3 snooping, loop protection, MAC-Port mapping, STP root guard, Voice VLAN, MLD snooping (MLDv1 and v2), 16k MAC Table or more, PVST+ compatibility mode, VLAN Mirroring (RSPAN), Support IEEE 802.1Q (4000 VLAN IDs), Should support GARP VLAN Registration Protocol / GVRP, VLAN classification by protocol and port, VLAN Double tagging (Q-in-Q).	Layer 2 Features: Should support STP, RSTP, MSTP, IGMP v1/v2/v3 snooping, loop protection, 8k MAC Table or more, IEEE 802.1Q (4000 VLAN IDs), IEEE 802.3, IEEE 802.3u, IEEE 802.3ab, IEEE 802.3ad, IEEE 802.1p, IEEE 802.1Q, IEEE 802.1AB, Jumbo Frame Up to 9.6K Bytes or more,	
5.	Resiliency: Should support IEEE 802.17/equivalent for sub 50ms ring protection in following scenario: single, dual fiber cuts in ring, Control Plane Prioritization (CPP), Loop Detection and Loop protection.	Resiliency: Should support recovery time < 30ms over 250 units of connection. Standard redundancy protocols like RSTP/MSTP & MRP.	
6.	Security: Should support ACL based on L2 and L3, Stateful Packet Filter, DHCP (Server, Relay and Client), IP Source guard, DAI, Private VLAN, AAA, Authentication (MAC, Web and IEEE 802.1x), BPDU Protection, sflow or equivalent, SSLv2 and SSLv3, TACACS+, LAG.	Security: Support ACL, TACACS+ and 802.1x User Authentication for security, DHCP (Server, Relay and Client, Authentication (MAC, Web and IEEE 802.1x), Device Binding security feature, Enable/disable ports, MAC based port security, Should have DOS/DDOS Auto Prevention.	

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

#	Technical Specifications	Revised Technical Specifications	Compliance (Yes / No)
7.	Qos: Policy-based QoS based classifying traffic based on MAC, Port, VLAN, Protocol, Tail drop for queue congestion control, Strict priority/ weighted round robin.	Qos: Support application-based QoS management.	
8.	Management: CLI, GUI, USB or memory card slot for taking backup of software release files configurations, DDM –Optical digital diagnostic monitoring as per SFF – 8472 or equivalent, UDLD or equivalent, Time Domain Reflectometry/ equivalent, RMON 4 groups, SNMPv3, Support ECO Friendly Mode, LLDP-MED, IEEE 802.3az, SNMPv6, Telnetv6 and SSHv6.	Management: Web-based, Telnet, Console (CLI), and Windows utility (Open-Vision) configuration, Support SNMP v1/v2c/v3 & RMON & 802.1Q VLAN Network Management, Provided HTTPS/SSH protocol to enhance network security.	
9.	The switch should support static & dynamic Routing, ping pooling and trace route.	The switch should support IEEE 802.3az Energy-Efficient Ethernet technology.	
10.	Should support Ipv4 and Ipv6 dual stack.	Should support Ipv4 and Ipv6 new internet protocol version.	
11.	Should inherently support operating temperature range of 0°C to 60°C or Better.	Should inherently support operating temperature range of 0°C to 60°C or Better.	
12.	Switch Certifications: RoHS compliant, UL, EN, FCC,	Switch Certifications: UL, EN, FCC, IEC60068-2-27 and IEC60068-2-6	
13.	Switch and FO Module should be from same OEM	Deleted	
14.	Any globally reputed Manufacturer should have 5 years of prior presence in India	Any globally reputed Manufacturer should have 5 years of prior presence in India	

3.3.10 Online UPS

The MSI shall provide an online uninterruptible power supply (UPS), which will provide continuous, clean, and reliable electrical power to filed equipment mounted on gantry/cantilever in the event of power disruptions or failures. Its primary function is to ensure that critical devices and systems remain operational even when the conventional power supply experiences problems.

The online UPS shall have provision for scaling up by adding external battery packs for extended runtime if necessary.

The MSI shall provide UPS with upto 4 hours of backup with uninterrupted power supply. The proposed system shall incorporate redundant power integration along with traditional power, ensuring an eco-friendly and renewable energy source.

MSI shall ensure the system is equipped with remote monitoring capabilities to facilitate efficient tracking and maintenance.

#	Technical Requirement	Revised Technical Requirement	Compliance (Yes/No)
99.	MODES OF OPERATION	MODES OF OPERATION	
100.	Normal: The UPS output power stage (inverter) should constantly recreate the UPS output voltage waveform by converting the DC bus voltage to AC voltage through a set of IGBT switches. In both online operation and battery operation, the output power stage (inverter) should create an output voltage waveform independent of the mains input voltage waveform. Input voltage anomalies such as brown-outs, spikes, surges, sags, and outages should not affect the amplitude or sinusoidal nature of the recreated output voltage sine wave of the output power stage (inverter). The input PFC power stage and the output power stage (inverter) shall operate in an on-line manner to continuously regulate power to the critical load. The input PFC stage shall be capable of full battery recharge while simultaneously providing regulated power to the load for all line and load conditions within the range of the UPS specifications.	Normal: The UPS output power stage (inverter) should constantly recreate the UPS output voltage waveform by converting the DC bus voltage to AC voltage through a set of IGBT switches. In both online operation and battery operation, the output power stage (inverter) should create an output voltage waveform independent of the mains input voltage waveform. Input voltage anomalies such as brown-outs, spikes, surges, sags, and outages should not affect the amplitude or sinusoidal nature of the recreated output voltage sine wave of the output power stage (inverter). The input PFC power stage and the output power stage (inverter) shall operate in an on-line manner to continuously regulate power to the critical load. The input PFC stage shall be capable of full battery recharge while simultaneously providing regulated power to the load for all line and load conditions within the range of the UPS specifications.	
101.	Battery: Upon failure of the AC input source, the critical load should be continued being supplied by the output inverter, which would derive its power from the battery system. There is no interruption in power to the critical load during both transfers to battery operation and retransfers from battery to normal operation.	Battery: Upon failure of the AC input source, the critical load should be continued being supplied by the output inverter, which would derive its power from the battery system. There is no interruption in power to the critical load during both transfers to battery operation and retransfers from battery to normal operation.	
102.	Bypass: The system automatic bypass shall provide a transfer of the critical load from the Inverter output to the automatic bypass input source during times when the inverter cannot support the load. Such times may be due to prolonged or severe overloads or to UPS failure. The UPS should constantly monitor the output current as well as the bypass source voltage and inhibit potentially unsuccessful transfers to automatic bypass from taking place.	Bypass: The system automatic bypass shall provide a transfer of the critical load from the Inverter output to the automatic bypass input source during times when the inverter cannot support the load. Such times may be due to prolonged or severe overloads or to UPS failure. The UPS should constantly monitor the output current as well as the bypass source voltage and inhibit potentially unsuccessful transfers to automatic bypass from taking place.

#	Technical Requirement	Revised Technical Requirement	Compliance (Yes/No)
103.	Automatic Transfers: An automatic transfer of load to bypass shall take place whenever the load on the critical bus exceeds the overload rating of the UPS. Automatic transfers of the critical load from bypass back to normal operation shall take place when the overload condition is removed from the critical bus output of the system. Automatic transfers of load to bypass shall also take place if for any reason the UPS cannot support the critical bus.	Automatic Transfers: An automatic transfer of load to bypass shall take place whenever the load on the critical bus exceeds the overload rating of the UPS. Automatic transfers of the critical load from bypass back to normal operation shall take place when the overload condition is removed from the critical bus output of the system. Automatic transfers of load to bypass shall also take place if for any reason the UPS cannot support the critical bus.	
104.	Manual Transfers: Manually initiated transfers to and from bypass may be initiated by the user display interface.	Manual Transfers: Manually initiated transfers to and from bypass may be initiated by the user display interface.	
105.		UPS Should be able to compatible with Solar System.	
106.		UPS monitoring Software: Centralized monitoring via SNMP v1, v3 or modbus TCP or physical server via Redfish protocols, User Management Secure outbound connections: Standard 2048-bit RSA certificate Accessible through Web or VPN based -- Cloud Based option with features like Device Search, Data Collection, Device Configuration, UPS Health Monitoring and interfacing with external systems through API.	

3.3.13 Solar Power Unit (New Addition)

Sr.	Features	Technical Specifications	Compliance (Yes/No)
1.	Solar Panels	3 Kva,48 v Mppt Solar PCU	
2.	Solar Module	40 w half-cut mono solar PV module or better	
3.	Battery Capacity	150~200Ah Battery	
4.	Output power	3000 W or better	

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

Sr.	Features	Technical Specifications	Compliance (Yes/No)
5.	MPPT voltage range	100~490VDC	
6.	Number of MPP trackers	2 or better	
7.	Efficiency	98% or better	
8.	Display	LCD or better	
9.	Inverter Type	Hybrid with Battery Storage	
10.	Mounting Structure	Non-corrosive	
11.	Operating temperature range	As per Odisha Climatic Condition	
12.	Certification	BIS	
13.	Protection Rating	IP 65 or better	

3.3.13 Storage System (New Addition)

#	Parameters	Descriptions	Compliance (Yes/No)
1	CPU	Intel® Xeon® E E-2136 6-core / 12-thread processor	
2	CPU Architecture	64-bit x86	
3	Encryption Engine	Yes Option should be available to support FIPS 1402 certified self-encrypting drives (SEDs) Or encryption at controller level with license	
4	System Memory	16 GB UDIMM DDR4 ECC (2 x 8GB), scalable upto 64 GB	
5	Memory Slot	4 x UDIMM DDR4	
6	Flash Memory	5GB (Dual boot OS protection)	
7	Drive Bay	24 x 3.5-inch SATA 6Gb/s, 3Gb/s	
8	Drive Compatibility	3.5-inch bays:	
		3.5-inch SATA hard disk drives	
		2.5-inch SATA solid state drives

Note:

- The bill of quantity provided is indicative only. The Bidders need to ensure that the desired functionality and scope of the work is fulfilled within the cost quoted, the Office of the Transport Commissioner will not consider any additional costs which are not mentioned in the Financial Bid Proposal.*
- The bill of quantities mentioned under Revised Price Bid format are only for bid evaluation.*
- The bidder will be responsible for safe storage and custody of materials, the office of the Transport Commissioner will not be responsible for providing any storage facilities.*
- The quoted value for PRE-IMPLEMENTATION COST - CAPEX should not be more than 80% of the overall Project cost. POST IMPLEMENTATION COST - OPEX should be 20% of the overall cost. (CAPEX : OPEX :: 80 : 20). In case quoted CAPEX cost is more than 80%, adjustment shall be made by the Office of the Transport Commissioner in equal proportions over the OPEX period to make cost of OPEX at least 20% of overall project cost.*
- The bidder shall quote Additional Requirement Cost as mentioned in the indicative Bill of Quantity, the cost will not be part of the Financial Bid Evaluation. The cost will be paid to the bidder as per the price discovered in this proposal.*

8 Annexure (7) – Volume 2: 7 Revised Project Timeline & Payment Milestones

The mode of payments to be made in consideration of the work and deliverables to be performed by the bidder shall be as follows. The Payment will be made to prime bidder only after performance deductions (if any) and statutory deductions (if any).

The Office of the Transport Commissioner at its sole discretion and depending on project progress and under certain criteria may release part-payment against any milestone payment after due undertaking from the bidder for completion of the activity or deliverable within 1 month of such submission of request by the bidder. However, the decision for part payment is entirely dependent on the Office of the Transport Commissioner.

Milestones and Payment Schedules for Implementation Phase

D = Effective Date of Letter of Intent or Contract Agreement (whichever is earlier)

D1 = Effective Date of Issue of Work Order

Milestones	Payment Milestones for the Implementation Phase	Payment Schedule	Time Schedule	Deliverables (Post approval by Authorised officer)
M 1	Site Survey	5% of Work Order Value (Capex Cost)	D1 + 3 Weeks	Technical Design Documents (HLD, LLD, Network Diagram) SRS document, Drawings along with feasibility study report of IEMS (Location & CCC)
M 2	Delivery & Verification of Hardware and related accessories	20% of Work Order Value (Capex Cost)	D1 + 8 Weeks	Delivery Challan, Functional Study Report (Applications & Edge Devices), Inception Report, Project Plan.
M 3	Civil Work with Cabling, Installation, Testing, Commissioning Hardware of IEMS Location & verification	20 % of Work Order Value (Capex Cost)	D1 + 10 Weeks Equal payment for each location completion	Site Commissioning Report, Warranty Certificates for the items supplied.
M 4	Installation, configuration, and Software/Application deployment	20 % of Work Order Value (Capex Cost)	D1 + 14 Weeks	Deployment Report
M 5	Acceptance Test for integration with UCCC Hardware & Application software	10% of Work Order Value (Capex Cost)	D1 + 16 Weeks	User Acceptance Report

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

Milestones	Payment Milestones for the Implementation Phase	Payment Schedule	Time Schedule	Deliverables (Post approval by Authorised officer)
M 6	Final Acceptance Test & Go-Live of the IEMS system	10% of Work Order Value (Capex Cost)	D1 + 22 Weeks	FAT Report Go-Live Report Security CERTIN Certificate
M 7	Completion of Training	5% of Work Order Value (Capex Cost)	D1 + 26 Weeks	Training Completion Report User Manual
M 8	30 Days of successful Go-Live	5% of Work Order Value (Capex Cost)	D1 + 30 Weeks	System Generated Stability reports for installed hardware/software. Completion of UAT and closure of observations report

Note:

The 5% of the of Capex for Software would be paid to the bidder/the lead bidder (in case of consortium) proportionately over the operation and maintenance period on Quarterly basis, Post Go-Live.

The Billing period of Hosting & maintenance Cost would begin after Go-Live.

Milestones	Payment Milestones for the Operations & Maintenance Phase	Payment Schedule	Time Schedule	Deliverable
M 9	Year 1 payment for O&M after Go-Live	20% of Work Order Value (Opex Cost) And 1% of Work Order Value for IEMS Software Components with licenses & Services (Capex Cost)	Equal Quarterly Invoice Payments	1. Detailed plan for monitoring of SLAs and performance of the overall system. 2. Quarterly Progress Report. 3. Weekly Progress Report. 4. Issues logging and resolution report. Note: Above
M 10	Year 2 payment for O&M	20% of Work Order Value (Opex Cost) And 1% of Work Order Value for IEMS Software	Quarterly	deliverables would be required to be submitted post Go-Live during Operations & Maintenance Period

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

Milestones	Payment Milestones for the Operations & Maintenance Phase	Payment Schedule	Time Schedule	Deliverable
		Components with licenses & Services (Capex Cost)		
M 11	Year 3 payment for O&M	20% of Work Order Value (Opex Cost) And 1% of Work Order Value for IEMS Software Components with licenses & Services (Capex Cost)	Quarterly	
M 12	Year 4 payment for O&M	20% of Work Order Value (Opex Cost) And 1% of Work Order Value for IEMS Software Components with licenses & Services (Capex Cost)	Quarterly	
M 13	Year 5 payment for O&M	20% of Work Order Value (Opex Cost) And 1% of Work Order Value for IEMS Software Components with licenses & Services (Capex Cost)	Quarterly	

Note:

- *Payment of Operations and maintenance phase shall be made on quarterly basis based on the adherence to monthly SLA compliance.*
- *The MSI shall work under project monitoring and supervision of Technical Support Unit (TSU - M/s. Palladium Consulting India Pvt. Ltd.) during the entire contract period of IEMS Project.*
- *The bidder shall share deliverables with TSU for technical review during the entire contract period of IEMS implementation. On successful completion of the review by TSU, it will be submitted for approval of Authority.*
- *All payments to the MSI shall be made upon submission of invoices along with necessary approval certificates from concerned Authorities.*

9 Annexure (8) – Volume 2: Upgradation of CCC to UCCC

3.1.1 Command and Control Centre (CCC)

The Office of the Transport Commissioner is operating DEESHA project as Enforcement Management System. The Project was started in July 2021 for 5 months of implementation and 3 Years of Operation and Maintenance. Under DEESHA project, Command and Control Centre (CCC) has been set up in an approximate area of 300 Sq Ft. at Bhubaneswar by the Office of the Transport Commissioner. The CCC is used by the Office of the Transport Commissioner for monitoring traffic violations identified through DEESHA Project. Based on the same, CCC is issuing the traffic challans through e-Challan System using the data available through Vahan 4.0 portal. The CCC situated at RTO-1, Bhubaneswar had been deployed by M/s - NIS Facility Management Services Pvt. Ltd. and developed on software platform provided by M/s - Videonatics. The National Informatics Centre (NIC) has provided the e-Challan software, which is integrated into the current solution for generating and communicating challans for traffic violations to relevant stakeholders. The CCC will be shifted to RTO-2, Chandrashekharapur, Bhubaneswar and will be upgraded to UCCC. Shifting is in process & existing system integrator will complete the shifting task. Present CCC has bare minimum civil infrastructure, furniture setup, networking components and power supply.

The details of the indicative hardware, networking, and infrastructure components available and installed at CCC are as follows:

Sr. No.	Major Component	Quantity	Make & Model
1	Video Wall	1 Unit	Delta, Icon Pro Series - D
2	Desktop	4 Nos	HP 280 Pro G6
3	Online UPS	1 No	10KVA
4	Application Server	2 Nos	HP Make
5	Workstations Furniture	6 Nos	Standard

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

The MSI shall conduct its own study of DEESHA CCC Solution and its accessories like hardware, application server, UPS & operators' workstation. The MSI shall prepare a strategy for optimum use of the available legacy systems and its components along with new requirements given in the Financial Bid format for UCCC. For example, the MSI shall utilize the existing application server for analytics of the data received from new IEMS locations through Video Analytic Cameras installed for detection of traffic violations and the same should be demonstrated at the time of PoC.

The indicative specifications of the abovementioned major components are listed below.

Video Wall and Controller

Sr. No.	Feature	Specification
1.	Configuration	Video wall cubes of 50" diagonal in a 2 x 2 configuration complete with base stand
2.	Native Resolution	Full HD (1920x 1080)
3.	Light Source Type	Laser light source, Individual cube should be equipped with multiple laser banks and each laser bank should have an array of diodes.
4.	Brightness of Projection engine	Minimum 2000 lumens
5.	Brightness of Cube	Minimum >500 nits
6.	Brightness Uniformity	≥ 95%
7.	Dynamic Contrast	1000000:1
8.	Control	IP based control
9.	Remote	IR remote control quick access
10.	Screen to Screen Gap	≤ 0.2 mm
11.	Inputs	Digital DVI, HDMI
12.	Cube Depth	Total Cube depth should be ≤ 744 mm
13.	Monitoring of critical parameters	Internal Temperature, Brightness, Cooling, Light Source Status, should be possible to demonstrate these parameters through active monitoring interface
14.	Maintenance Access	Rear
15.	Cube Size	Each cube should have a screen size of 1107mm wide and 623mm high and depth ≤ 470 mm
16.	Display & Controller	Display & Controller should be from the same manufacturer
17.	Display controller	Controller to control 4 displays with 4 outputs, 4 DVI Inputs along with necessary software's
18.	Chassis	19" industrial Rack mount, Lockable front door to protect drives
19.	Operating System	Window 7- 64 bit
20.	Processor	Xeon/ i3/i5/ i7
21.	RAM	Std. 4 GB DDR3
22.	HDD	Support up to minimum 2 HDD, Std.: 500 GB
23.	Networking	Dual-port Gigabit Ethernet Controller inbuilt, Supports Add on copper/ optical fiber adapters
24.	Input / Output	Serial ATA, LAN, 2x RJ45 LAN ports, USB 2.0 port
25.	RAID	RAID 0, 1, 5, 10 supports
26.	Power Supply	(1+1) Redundant hot swappable

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

Sr. No.	Feature	Specification
27.	Cooling	Forced cooling
28.	Indicators	LED's for HDD activity and Power status
29.	Switches	Power On/Off and System Reset
30.	Monitoring options	CPU, FAN, Temperature
31.	Accessories	DVD +RW, Keyboard and mouse
32.	Voltage	100-240V @ 50/60 Hz
33.	Redundancy	Power Supply, HDD, Cooling FAN, LAN ports
34.		Minimum 2000 lumens
35.	Scalability	Display multiple source windows in any size, anywhere on the wall
36.	Control functions	Brightness / contrast / saturation/ Hue/ Filtering/ Crop / Rotate
37.	Outputs	4 DVI
38.	Resolution support	DVI: 1920x1200 RGB: 2048x1536
39.	DVI Inputs	4 DVI
40.	Accessories	DVD-R, DVD+RW, Keyboard, mouse
41.	Power Supply	(1 + 1) Redundant AC-DC high-efficiency power supply, AC Voltage 100 – 240V, 50-60Hz
42.	Operating	Operating Temperature: 10° to 40°C, Humidity: 10 – 90% non-condensing
43.	Scaling and display	Software to enable the user to display multiple sources in any size and anywhere on the display wall.
44.	Auto Source Detection	Software should support for auto source detection
45.	Layout Management	Support for Video, RGB, DVI, Internet Explorer, Desktop Application and Remote Desktop Monitoring Layouts
46.	Scenarios	Software Save and Load desktop layouts from Local or remote machines
47.	Layout Scheduler	Software support auto launch of Layouts according to specified time or event by user
48.	SNTP	System support SNTP function

Desktop

Sr. No.	Feature	Specification
1.	Processor	9 th Generation Intel Core i7- or equivalent/ higher AMD Processor, minimum 4 Core
2.	Speed	4 GHz
3.	Chipset	Compatible Chipset on OEM Motherboard
4.	Graphics	NVIDIA Quadro P620 or Better
5.	Memory	8 GB GDDR5, Memory Interface 128-bit, dual channel expandable up to 64 GB with minimum 4 DIMM slots
6.	Hard Disc	2TB SATA II 3.0 Gbps HDD, 7200 RPM or better
7.	Optional Drive	22X Internal SATA DVD WRITER

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

Sr. No.	Feature	Specification
8.	Audio	Integrated HD audio with 5.1 surround sound & multi streaming capability
9.	Network	On-board Gigabit (10/100/1000 Mbps) Ethernet Controller with WOL support
10.	Expansion Bus	Minimum 1 x PCI E X16 slot ,2x PCI E X1 slot
11.	Interfaces	Minimum 4 nos. SATA on-board, 1serial port, min 3 USB (V3.0) ports (2 front), 1 Line in , 1 Line out, 1 RJ-45 , 1 VGA, Display Connectors 4x Mini DisplayPort 1.4
12.	Keyboard & Mouse	USB Mechanical Keyboard 107 Keys or more, USB Optical Scroll Mouse with antistatic mouse pad (Same Make as PC)
13.	Monitor	32" LED Monitor, Maximum resolution – 1366 x 768; Response time (typical)- 5ms; 24x7 Industrial Monitor
14.	OS	Windows 10 Professional or higher OS Pre-Loaded.
15.	OS Support	Microsoft Windows 10 Professional
16.	Warranty	comprehensive on-site OEM Warranty

Online UPS

Sr. No.	Feature	Specification
1.	INPUT	Nominal Voltage: 380V / 400V / 415V AC (3P+N+PE) Operating Voltage Range: 190V~499V AC Load Dependent Operating Frequency Range: 50 / 60 Hz \pm 10% (Auto Sensing) Power Factor: \geq 0.99 Bypass Voltage: - 40% ~ +15% (Configurable) Frequency: \pm 5% (Configurable) ECO Range: Same as the Bypass, can be configured. Generator Input: Compatible
2.	OUTPUT	Rated Voltage: 220V / 230V / 240V AC L+N+PE (Configurable) Power Factor: 0.8 (Standard) 0.9 / 1.0 (Optional) Voltage Regulation: \pm 1% Frequency: Auto Sensing 50 / 60 Hz \pm 1~10% Sync Mode (Configurable), 50/60 Hz \pm 0.5 Hz Battery Mode Crest Factor: 3:1 Overload: \leq 105% for Continuous, \leq 125% for 10 Min, \leq 150% for 60 Sec, \geq 150% for 200ms Harmonic Distortion (THDv): \leq 2% with Linear Load, \leq 5% with Non-Linear Load Efficiency: Up to 94% Dual Conversion Mode, 99% ECO Mode
3.	BATTERY	Battery Voltage: 192V DC / 216V & 240V DC (Configurable) Typical Recharge Time: 6~8 Hours to 90% of full Capacity Charge Current: 10A Configurable (optional)

RFP for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS)

Sr. No.	Feature	Specification
4.	SYSTEM FEATURES	IP Protection: IP 20 Transfer Time: Zero EPO / ECO / CVCF: Shutdown UPS Immediately / ECO and CVCF Mode can be Configurable. Alarm / Protection: Short Circuit, Input Under/Over Voltage, Over Temperature, Over Current, Overload, DC BUS Under / Over Voltage and Battery low
5.	Display	Line Mode, Backup Mode, ECO Mode, Bypass Mode, Battery Low, Battery Bad, Overload & UPS Fault, Input Voltage, Input Frequency, Output Voltage, Frequency, Current; Load Percentage, Battery Voltage, Charging/ Discharging/Current Temperature & Remaining Battery Backup Time, Load VA/W, Load and Battery Barograph
6.	ENVIRONMENTAL	Temperature: Operating: 0~45°C, Storage: -20°C ~ 55°C Humidity / Altitude: 0~95% RH Non-condensing / <1500 M Noise: <65dB at 1meter distance Quality: ISO 90001, ISO 14001, OHSAS 18001, ISO 27001 ISO 50001, BIS, RoHS, FCC Safety: IEC/EN62040-1; Conformity to IEC / EN EMC / Performance: IEC/EN62040-2; IEC/EN62040-3, Complying to CE, Compliance to UL
7.	COMMUNICATION INTERFACE	Standard: RS-232 Optional: SNMP / ModBus / Dry Contact / USB / RS-485 Monitoring Software

Application Server

Sr. No.	Feature	Specification
1.	Certification(s) Required	OEM - ISO 9001 Manufacturer, VM Ware, HyperV, Red Hat Virtualization
2.	Std. Compliance(s) Req.	UL, FCC & RoHS
3.	Rack	2U Rack Mountable
4.	CPU	2x Minimum 2.4GHz. Latest series/ generation X86 based Processor. Core per CPU is 16.
5.	Chipset	OEM Chipset or equivalent OEM motherboard/ chipset.
6.	GPU	Should support minimum 4 Co-Processor/ GPU
7.	GPU Card	4*NVIDIA T416GB Card/ NVIDIA A10/Higher Co-Processor or GPU card
8.	RAM	256 GB DDR4 RAM, supports with up to 1TB
9.	Storage	Minimum 4 Hot Plug 2.5/ 3.5-inch SATA/SAS HDD Bays
10.	Storage	Minimum 2x500GB SSD Hard disk drive
11.	GPU Slot	Minimum 6xPCIe 4.0, X16 single slot half Height for GPU
12.	RAID	RAID, supports RAID 1,5,6
13.	Cluster Support	Cluster support for high availability
14.	Ethernet Port	Minimum 2x10Gb Ethernet Port, Support for 2x1/10G Base-T

Sr. No.	Feature	Specification
15.	Ports	USB 3.0 support with minimum 4 ports, DVD/CD-RW combo drive
16.	Power Supply	Redundant hot swappable Power Supplies, Redundant hot swappable Fans
17.	Operating System	Compatible with Microsoft Windows Server latest version Standard and datacenter Edition (32 bit and 64 bit), Ubuntu Latest version (32 bit and 64 bit)
18.	Operating System	OS Ubuntu 18.4
19.	Warranty	5 years comprehensive onsite warranty
20.	Server Management	Server Management software with the device drivers
21.	Processor	2x Minimum 2.4GHz. Latest series/ generation X86 based Processor. Core per CPU is 16.

3.1.2 Unified Command and Control Centre (UCCC)

The MSI shall be responsible for upgrading the existing command and control centre including but not limited to hardware and software components to a Unified Command and Control Center (UCCC) which will be capable of processing live feeds from the identified locations.

The MSI shall upgrade the existing CCC to the UCCC to ensure all required hardware like videowall, IT equipment, third party software, antivirus, firewall, etc. are seamlessly integrated on UCCC platform.

The MSI shall set up operator workstations, network connectivity and software for processing traffic violations, power backups, firewall, antivirus licenses, etc.

The MSI shall provide dedicated primary- secondary link along with link load balancer at UCCC for connecting IEMS locations and UCCC.

The MSI shall be responsible for providing 1:1 network bandwidth according to the number of field locations i.e. bandwidth requirement at each location multiplied by number of locations.

The MSI shall ensure data security by provisioning point to point secured encrypted leased lines from IEMS locations to UCCC as well as the OSDC / cloud infrastructure.

The new IEMS application shall be integrated with the e-Challan System developed by NIC for the entire project duration and UCCC operators deployed by MSI shall be responsible for manually validating offenses and transmitting this validated data to the e-Challan solution. NIC e-Challan Software will issue e-Challans. Manual Cross-validation (adjudication) will be conducted by MSI. Print of e-Challan, courier of e-Challan will be done by Office of Transport Commissioner.

The MSI shall be responsible for the complete operation and maintenance of the Unified Command & Control Centre (UCCC).

The UCCC solution shall be capable of processing information obtained from ANPR System, Speed Violation Detection System and Video Analytic System for detection of Traffic Violations through a Video Image processing unit and shall perform real- time remote incident detection at designated IEMS locations, record information on violators at IEMS software end for generation of e-Challans. On requirement the system shall have the capability to communicate

with nearby RTO offices or Police Stations as per directions from the office of the Transport Commissioner. It shall also communicate such detected incidents to DC hosted on Managed Cloud for storage, analysis & reporting.

Minimum Requirements for MSI

The Unified Command & Control Centre (UCCC) shall be IP enabled centralised solution that will support the all-in-one unification of various systems including existing legacy systems like DEESHA system and its CCC software, e-Challan system, storage management, emergency response support system, etc. A single security interface for managing, configuring, monitoring, coordinating, gathering intelligence, and reporting on different embedded systems and related field devices shall be provided.

The following are the indicative functional requirements of UCCC required for IEMS operations. MSI is expected to use all the functionalities of IOT platform for holistic management within the scope of this RFP.

The required features of UCCC are as follows:

- Integrated Dashboard: This feature allows for the creation of customizable reports via the dashboard in addition to real-time tracking and alert systems.
- DEESHA Video Wall and Controller System Integration with Operator Workstation
- Notifying system services via email services.
- Emergency Operation and Help Desk Service.
- Essential electrical and civil work, including fire safety.

The UCCC shall support the seamless unification of various traffic enforcement management system, IP automatic number plate recognition system (ANPR), Incident management, Emergency response system. Record management with future scalability to include Traffic violation management solutions also under a single platform. The UCCC user interface (UI) applications shall present a unified security interface for the management, configuration, monitoring, co - relation, intelligence and reporting of various embedded systems and associated field devices.

The platform must be Cloud ready from day 1 and must have the ability to host either in total or some of the modules in a private cloud environment approved by Meity.

The platform shall have natively failover.

The UCCC platform must be a true unified management experience for critical infrastructure, simplifying control room operation and legacy system integration, and increasing operational efficiency critical to rapid decision-making.

The UCCC shall be integrated with other independent legacy systems through a single Unification point with consistent user interface and better operational efficiency.

The system shall integration scalability of various equipment like Cameras, Radars, Storage devices, field sensors from IEMS locations.

The UCCC platform shall provide a dashboard functionality to manage workflows by integrating information from different agencies and systems to facilitate responsive decision making.

The system shall enable cross-system and cross-agency coordination to monitor, operate and manage the enforcement for traffic violations in an integrated & unified manner.

UCCC Architecture:

- The system shall be IP-enabled solution using standard TCP/IP protocol with TLS encryption for secure communication.
- It shall have ability to handle up to a hundred (100) connected clients simultaneously and unlimited installations.
- It shall have support for unlimited logs and historical transactions based on available storage.
- The system shall have native failover options for hardware and application levels without external dependencies.

Video Image Processing:

The system offered shall be modular and multi-functional. The Video Image processing coupled to the video analytics camera & pole security camera shall have the capacity to detect the presence of objects/vehicles in the entire field of view of the camera. If the service provider wants to centralize the analytics for detection of incidents at the command centre or on cloud, they need to ensure the inference times shall not be more than 5 seconds. Further, in case of internet connectivity is lost, incidents will be automatically stored and processed at LPU, on retaining internet connectivity the same shall be transmitted to UCCC.

Alarm management:

- The system shall have capability of creation and modification of user-defined alarms with time schedules and priority levels.
- The system shall have capability of grouping alarms by source and type, assigning recipients, and managing alarm notifications.
- The system shall be able to push alarm notifications via designated email addresses or devices using the SMTP protocol.
- The UCCC shall also support alarm notification to a designated email address or any devices (may be a Laptop/Computer/Tablet) using the SMTP protocol.

Video Management System (VMS)

The proposed Video Management System (VMS) shall provide a complete end-to end solution for traffic surveillance application. The VMS shall be an enterprise class IP based application with Server-client architecture. The VMS shall support cameras using the industry standards ONVIF Profiles. The VMS shall have Servers for Recording management and Client Interface as integral part of the solution.

The VMS shall be capable to record the live streaming flow of videos with appropriate codec and security certifications in place. The Analytical platform shall revert the derived outcomes to the VMS which shall be forwarded to the VMS clients located in the UCCC.

The Surveillance System shall not have any limit on the number of cameras to be connected for Surveillance, Monitoring and Recording. Any increase in the no. of cameras shall be possible by augmentation of Hardware components.

The UCCC operators shall have following access to the video feeds.

- Viewing of the live Video Streams from IEMS locations.
- Viewing rights to the stored feeds.
- Viewing of video feeds basis upon the Alerts / Exceptions / Triggers raised by Video Analytics, and ANPR system.
- Provide search of recorded video, advanced search should be possible based on various filters like alarm / event, area, camera, etc.
- Export rights of video / other critical incident data based on appropriate rights and privileges.
- Ability to back up data on demand/ schedule based.
- Viewing of video feeds from DEESHA system through integration

Video Management Server(s) for Camera feeds

The Video Management Servers shall provide centralized management of all cameras installed at IEMS locations. The database shall be able to support at least 300 cameras / IP end points in a single server. The Server shall provide with 1:1 redundancy. The failover time shall not be beyond 60 Seconds and there should not be any loss in the Live and Recorded Videos of the connected cameras.

The solution shall be capable to be running in virtualisation / physical server environment in the UCCC. The Standby server shall support data recovery scenarios where a server can be on managed cloud and only take over if Primary server become offline. The Standby Server shall support real-time synchronization of the configuration databases for high reliability.

Video Recording Server(s) for Camera feeds

In the IEMS solution, the Video Recording Servers shall be running centrally in the best possible efficient environment in UCCC. The recording Servers shall have N:1 redundancy. There should not be any loss in the Live and Recorded Videos of the connected cameras due to failover.

There shall be 10% buffer to handle the additional storage database or failover requirements.

Storage requirement for Camera Video Streams

In the IEMS solution, there shall be centralized storage for all cameras at UCCC. The centralised storage shall be planned at UCCC to store all camera feeds for 365 days 24/7 at least with Full HD or better resolution at 30 FPS with suitable (H264 or higher) video compression.

The recordings of all cameras shall happen at UCCC. In case UCCC goes down, traffic incidents, related evidence, and any other critical incidents along with supportive evidence shall be transmitted to DR available in Managed Cloud Services, which shall have provision of scalability.

The system shall have scalable storage capacity for additional IEMS locations at UCCC which shall be added in future as per the instructions from office of the Transport Commissioner.

The video feeds related to incidents and important in nature and which may be required for evidence purposes shall be flagged by the UCCC operators. The flagged data shall be archived in the storage as defined by the office of the Transport Commissioner.

Technical Requirements:

The MSI shall ensure all the licenses shall be provided for 350 camera licenses (scalable up to 1000).

The VMS application must seamlessly Integrate with the UCCC platform including the sub modules like ANPR, SVD and Video Analytics systems for all the functionalities outlined.

The VMS shall integrate with IEMS field devices using dedicated driver or using the industry standards ONVIF Profiles.

The Proposed VMS Solution shall support native Fail over with in application with no dependency on any external application for both hardware and application redundancy. The Standby VMS server shall support disaster recovery scenarios where a server can be on managed cloud and only take over if Primary server become offline. The Standby Server shall support real-time synchronization of the configuration databases for high reliability. The solution shall allow evidence videos/images to be protected against normal disk clean-up routines.

The proposed solution shall be scalable to support live viewing and automatic transfer of video recorded to the cloud on demand basis from UCCC, based on the age of the video for future scalability and the hosted Cloud Platform must be among the approved vendors as per the MeITY approved GI Cloud initiative from Govt of India. The proposed application must provide a single interface to monitor, collaborate and action for all IEMS devices like cameras, radar devices etc.

The VMS Platform must have the capability to real time and scheduled backup video/ Flagged and critical data to Managed Cloud Services.

The VMS platform must have the flexibility to deploy rules for storing and avoiding data deletion of the flagged data, critical data, & Incident reports based on the criticality of the data.

The Monitoring UI shall provide an interface to support the following tasks and activities common to Various systems.

- Monitoring the events from a live security system.
- Generating reports, including custom reports.
- Monitoring and acknowledging alarms.
- Creating and editing incidents and generating incident reports.
- Displaying dynamic graphical maps and floor plans as well as executing actions from dynamic graphical maps and floor plans Unified with UC&C.

The live video viewing capabilities of the Monitoring UI shall include:

- The ability to display all cameras attached to the system both Public, Collaborative monitoring and Cloud based entities.
- The ability to drag and drop a camera into a display tile for live viewing.
- The ability to drag and drop a camera from a map into a display tile for live viewing.
- Support for digital zoom on live camera video streams.
- The ability to bookmark important events for later retrieval on any archiving camera and to uniquely name each bookmark in order to facilitate future searches.

- The ability to start/stop recording on any camera in the system that is configured to allow manual recording by clicking on a single button.
- The ability to activate or de-activate viewing of all system events as they occur.
- The ability to switch to instant replay of the video for any archiving camera with the simple click of button.
- The ability to take snapshots of live video and be able to save or print the snapshots.
- The ability to browse through a list of all bookmarks created on the system and select any bookmarked event for viewing.
- Tools for exporting video and a self-contained video player on various media such as USB keys, CD/DVD-ROM and external hard disk. This video player shall be easy to use without training and shall still support reviewing video metadata. However, the MSI shall be responsible for providing appropriate training and user manuals.
- Tools for exporting video sequences in standard video formats, such as ASF, MP4.
- The ability to encrypt exported video files with industry standard encryption.
- A tool building and exporting a set of videos into a single platform (physical/cloud).
- The VMS shall support only secured media stream requests, unless explicitly configured otherwise. Secured media stream requests shall be secured with strong certificate-based authentication.

Network Connectivity:

- The MSI shall make provision for network services so that the entire network shall be scalable as & when required without interrupting the services. The MSI will be responsible for any LAN cabling requirement at UCCC.
- The MSI will be responsible for providing outer boxes for network components at UCCC, if required any.

10 Annexure (9) – Volume 2: List of Locations

- Office of the Transport Commissioner, Odisha intends to implement IEMS Project across Odisha locations.
- The bill of quantities mentioned under Revised Price Bid format are only for bid evaluation.
- The MSI shall conduct a feasibility survey in consultation with office of the Transport Commissioner, Odisha on Highways and other roads of Odisha to identify the locations for implementation of IEMS as per the requirement of Office of the Transport Commissioner, Odisha.
- The bidder shall conduct Survey in consultation with office of the Transport Commissioner, Odisha to identify the locations which will be powered through UPS, solar power.
- The number of locations will be finalized during Contract execution by Office of the Transport Commissioner, Odisha.

11 Annexure (10) – Volume 1: BG format for EMD

Bank Guarantee Format for furnishing EMD

Whereas (hereinafter called the “Tender”) has submitted their offer dated..... for Selection of Vendor for Upgradation of existing Command Control Centre to Unified Command Control Centre & Implementation of Intelligent Enforcement Management System (IEMS) for Office of the Transport Commissioner, Odisha (hereinafter called the “Tender”) against the Tender No.

KNOW ALL MEN by these presents that WE Of having our registered office at..... are bound unto (hereinafter called the “Purchaser”) in the sum of for which payment will and truly to be made to the said Purchaser, the Bank binds itself, its successors and assigns by these presents.

Sealed with the

Common Seal of the said Bank this..... day of20..... THE CONDITIONS OF THIS OBLIGATION ARE:

(1) If the tenderer withdraws or amends, impairs or derogates from the tender in any respect within the period of validity of this tender.

(2) If the tenderer having been notified of the acceptance of his tender by the purchaser during the period of its validity: -

a) If the tenderer fails to furnish the Performance Security for the due performance of the contract.

b) Fails or refuses to accept/execute the contract.

WE undertake to pay the Purchaser up to the above amount upon receipt of its first written demand, without the Purchaser having to substantiate its demand, provided that in its demand the Purchaser will note that the amount claimed by it is due to it owing to the occurrence of one or both the two conditions, specifying the occurred condition or conditions.

This guarantee will remain in force upto and including 45 days after the period of tender validity and any demand in respect thereof should reach the Bank not later than the above date.

Our branch at _____ (Name & Address of the branch) is liable to pay the guaranteed amount depending on the filing of claim and any part thereof under this Bank Guarantee only and only if you serve upon us at our _____ branch a written claim or demand and received by us at our _____ branch on or before Dt. _____ otherwise, bank shall be discharged of all liabilities under this guarantee thereafter.

(Signature of the authorized officer of the Bank)

Name and designation of the officer

Seal, name & address of the Bank and address of the Branch
